Scan to practise this topic online

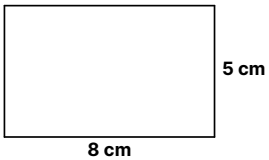

KEY WORDS perimeter *(paenga)* · length *(roa)* · width *(whānui)* · rectangle *(tapawhā hāngai)*

A Rectangles and squares ●○○

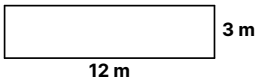

Remember: The perimeter is the distance all the way around a shape. For a square $P = 4l$. For a rectangle $P = 2(l + w)$.

1. Find the perimeter of each rectangle.

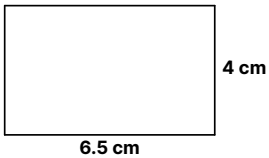

a)

b)

c)

2. Find the perimeter of:

a) A square with sides of 7 cm

b) A rectangle 15 m long and 8 m wide

c) A square with sides of 2.5 m

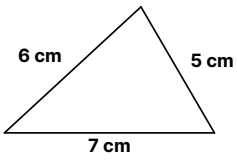

d) A rectangle 20 cm long and 4.5 cm wide

B Other shapes ●●○

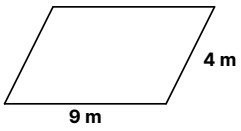

Remember: Add the lengths of all the sides. In a regular shape every side is the same length.

3. Find the perimeter of each shape.

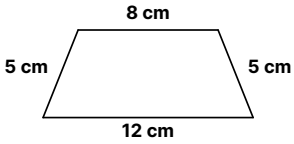

a)

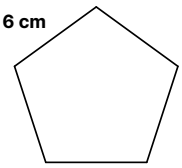

b)

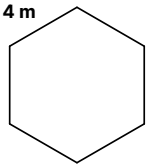

c)

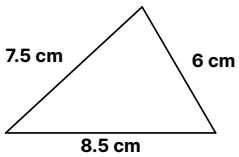

d)

e)

f)

C Missing sides ●●●

> **Remember:** Work backwards from the perimeter. A square has 4 equal sides, so each side is the perimeter divided by 4.

4. Answer each question.

a) A square has a perimeter of 36 cm. Find the length of its sides.

b) A rectangle has a perimeter of 26 cm and a length of 8 cm. Find its width.

c) A triangle has a perimeter of 24 cm. Two of its sides are 9 cm and 7 cm. Find the third side.

d) A regular hexagon has a perimeter of 42 m. Find the length of each side.

e) A rectangle has a perimeter of 40 m and a length of 12.5 m. Find its width.

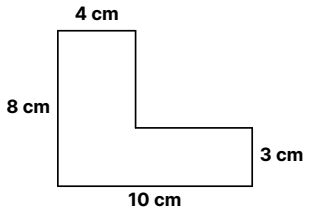

f) A square has a perimeter of 10 m. Find the length of its sides.

D Composite shapes ●●●

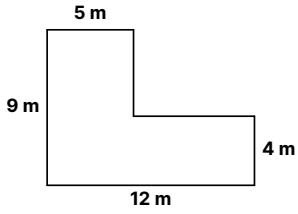

> ⚠ **Watch out:** Some sides are not labelled. Work them out first from the sides that are, then add every side.

5. All the corners are right angles. Find the perimeter of each shape.

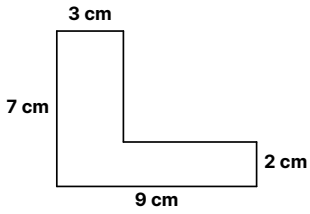

a)

b)

c)

E Problems ●●●

6. A rectangular garden is 9 m long and 6 m wide. A fence goes all the way around it, except for a gate that is 2 m wide. How long is the fence?

7. A rectangular field is 25 m long and 15 m wide. Tane runs around it 3 times. How far does he run?

8. A piece of wire 60 cm long is bent to make an equilateral triangle. How long is each side?

★ Extension

9. A rectangle has a perimeter of 24 cm. Its length is twice its width. Find its width.

10. Draw two different rectangles that each have a perimeter of 20 cm. Label the sides.

C Missing sides ●●●

> **Remember:** Work backwards from the perimeter. A square has 4 equal sides, so each side is the perimeter divided by 4.

4. Answer each question.

a) A square has a perimeter of 28 cm. Find the length of its sides.

b) A rectangle has a perimeter of 32 cm and a length of 9 cm. Find its width.

c) A triangle has a perimeter of 30 cm. Two of its sides are 11 cm and 8 cm. Find the third side.

d) A regular pentagon has a perimeter of 45 m. Find the length of each side.

e) A rectangle has a perimeter of 50 m and a length of 14.5 m. Find its width.

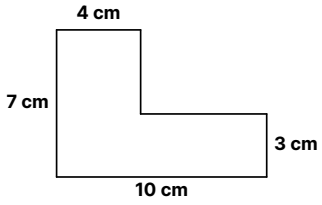

f) A square has a perimeter of 14 m. Find the length of its sides.

D Composite shapes ●●●
