KEY WORDS surface area *(horahanga mata)* · curved surface · slant height *(teitei tītaha)* · net *(raupapa mata)*

A Triangular prisms ●○○

Remember: Think of the net: two triangles and three rectangles. Each rectangle is one side of the triangle times the length of the prism.

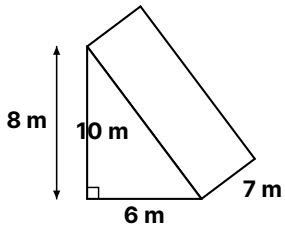

1. Find the surface area of each prism.

a)

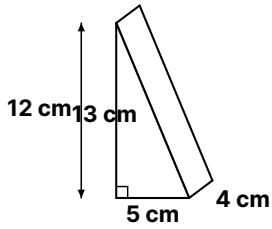

_____

b)

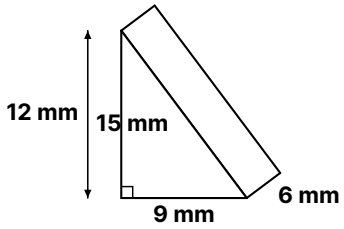

_____

c)

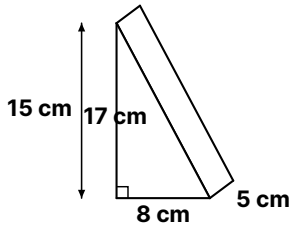

_____

d)

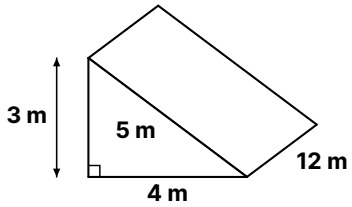

_____

e)

_____

f)

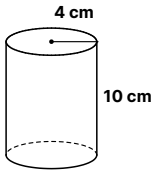

_____

B Cylinders ●●○

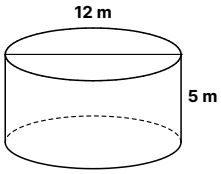

Remember: The net of a cylinder is two circles and a rectangle whose length is the circumference: SA $= 2\pi r^2 + 2\pi rh$. Give answers to 1 decimal place.

2. Find the surface area of each cylinder. In (e) and (f) find the curved surface only.

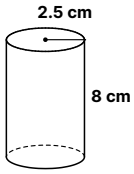

a)

b)

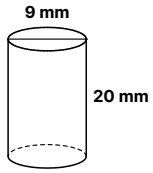

c)

© 2026 Cell Tuition. You may print and photocopy this worksheet for your own classes and children. It may not be changed, sold or posted on other websites.

d)

e) The curved surface only of a cylinder with radius 3 cm and height 7 cm

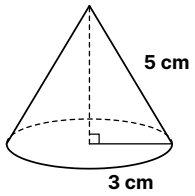

f) The curved surface only of a cylinder with diameter 10 m and height 4 m

C Cones ●●○

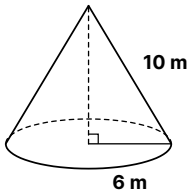

Remember: Curved surface of a cone $= \pi rl$, where l is the slant height. Add the base circle πr^2 for the total. If only the height is given, find l with Pythagoras first.

3. Find the total surface area of each cone, to 1 decimal place.

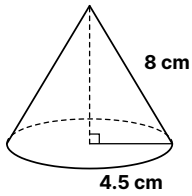

a)

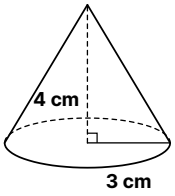

b)

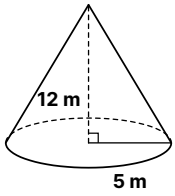

c)

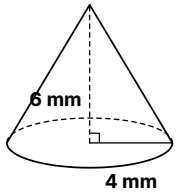

d)

e)

f)

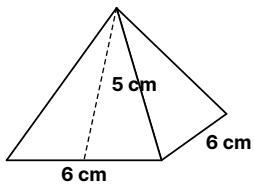

D Pyramids ●●●

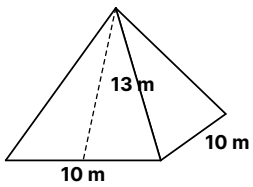

Remember: A square pyramid is a square and four identical triangles. The height of each triangle is the slant height of the face.

4. Find the surface area of each square-based pyramid.

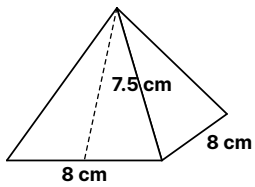

a)

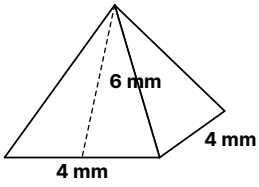

b)

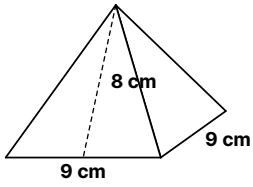

c)

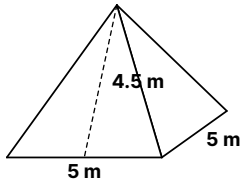

d)

e)

f)

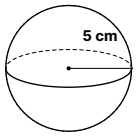

E Spheres and hemispheres ●●○

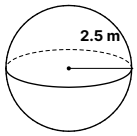

Remember: Surface area of a sphere $= 4\pi r^2$. A solid hemisphere has half of that plus its flat circular face.

5. Find the surface area, to 1 decimal place. In (d) to (f) the solid is a hemisphere (half a sphere), including its flat face.

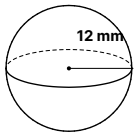

a)

b)

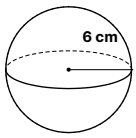

c)

f)

F Problems ●●●

6. A spherical buoy has a radius of 0.6 m. One litre of marine paint covers 5 m². How many litres are needed to paint it, to 1 decimal place?

7. A cylindrical water tank has a radius of 1.5 m and a height of 2 m. The whole outside, including the top and bottom, is to be painted. One litre of paint covers 9 m². How many litres are needed, to 1 decimal place?

8. An ice cream wafer is a cone (no base) with a radius of 3 cm and a slant height of 11 cm. Find the area of wafer, to 1 decimal place.

9. A ball has a radius of 11 cm. The leather for a ball costs $20 per square metre. Find the cost of the leather for one ball, to the nearest cent.

10. A tent is a triangular prism lying on one rectangular face. Its end is a right-angled triangle with sides 3 m, 4 m and 5 m (the 3 m side is on the ground), and the tent is 6 m long. Find the area of cloth, counting the two sloping faces, the two triangular ends, but not the floor.

★ Extension

11. A sphere has a surface area of 500 cm². Find its radius, to 1 decimal place.

12. A hemispherical bowl has a radius of 10 cm. It is glazed inside and outside (the thin rim is ignored). Find the glazed area, to 1 decimal place.

13. A cylinder and a sphere have the same radius r, and the cylinder's height is 2r (so the sphere fits exactly inside it). Compare their curved surface areas.

F Problems ●●●

6. A spherical buoy has a radius of 0.8 m. One litre of marine paint covers 5 m². How many litres are needed to paint it, to 1 decimal place?

7. A cylindrical water tank has a radius of 1.2 m and a height of 2.5 m. The whole outside, including the top and bottom, is to be painted. One litre of paint covers 8 m². How many litres are needed, to 1 decimal place?

8. An ice cream wafer is a cone (no base) with a radius of 3.5 cm and a slant height of 12 cm. Find the area of wafer, to 1 decimal place.

9. A ball has a radius of 12 cm. The leather for a ball costs $24 per square metre. Find the cost of the leather for one ball, to the nearest cent.

10. A tent is a triangular prism lying on one rectangular face. Its end is a right-angled triangle with sides 6 m, 8 m and 10 m (the 6 m side is on the ground), and the tent is 5 m long. Find the area of cloth, counting the two sloping faces, the two triangular ends, but not the floor.

★ Extension

11. A sphere has a surface area of 800 cm². Find its radius, to 1 decimal place.

12. A hemispherical bowl has a radius of 12 cm. It is glazed inside and outside (the thin rim is ignored). Find the glazed area, to 1 decimal place.

13. A cylinder and a sphere have the same radius r, and the cylinder's height is 2r (so the sphere fits exactly inside it). Compare their curved surface areas.
