Gradient and the Equation of a Line

Name _____ Date _____ No calculator Version 1

Scan to practise this topic online

KEY WORDS gradient *(rōnaki)* · rise · run · y-intercept *(pūtahi-y)*

A Rise over run ●○○

Remember: Gradient = rise ÷ run. A line that goes down from left to right has a negative gradient.

1. Write the gradient of each line. Simplify any fractions.

a) A line goes up 6 for every 2 across _____

b) A line goes up 4 for every 1 across _____

c) A line goes down 3 for every 1 across _____

d) A line goes up 1 for every 2 across _____

e) A line goes up 8 for every 4 across _____

f) A line goes down 10 for every 5 across _____

g) A line goes up 3 for every 4 across _____

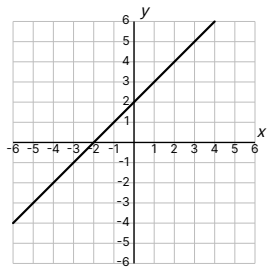

h) A line goes down 2 for every 6 across _____

B Gradient from a graph ●●○

Remember: Choose two points where the line crosses the corners of the grid squares. Count the rise and the run between them.

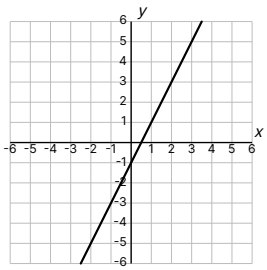

2. Find the gradient of each line.

a)

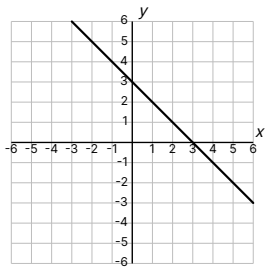

Gradient = _____

b)

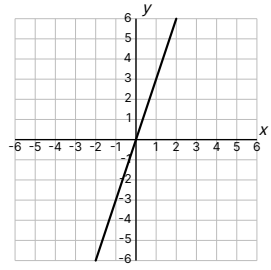

Gradient = _____

c)

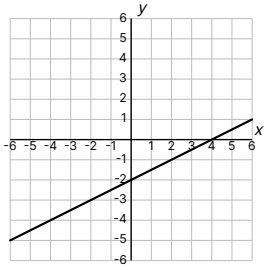

Gradient = _____

d)

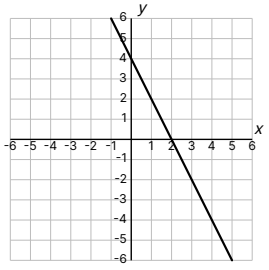

Gradient = _____

e)

Gradient = _____

f)

Gradient = _____

© 2026 Cell Tuition. You may print and photocopy this worksheet for your own classes and children. It may not be changed, sold or posted on other websites.

C Gradient and y-intercept from a table ●●○

Remember: The gradient is how much y changes when x goes up by 1. The y-intercept is the value of y when $x = 0$.

3. Find the gradient and the y-intercept of the line for each table.

a)

x	0	1	2	3	4
y	1	3	5	7	9

b)

x	0	1	2	3	4
y	-2	1	4	7	10

c)

x	0	1	2	3	4
y	6	5	4	3	2

d)

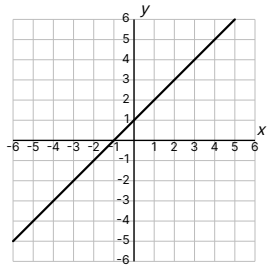

x	-1	0	1	2	3
y	-4	0	4	8	12

D The equation of a line from its graph ●●●

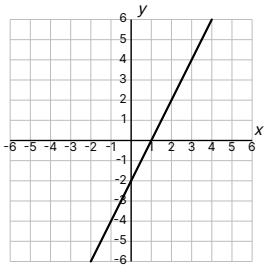

Remember: Find the gradient m and the y-intercept c, then write $y = mx + c$.

4. Write the equation of each line.

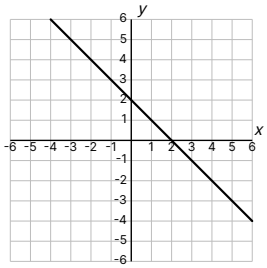

a)

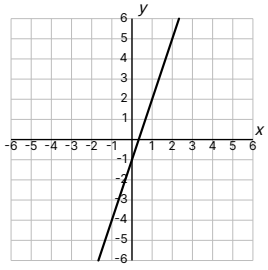

b)

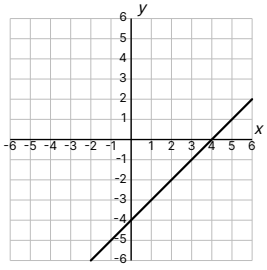

c)

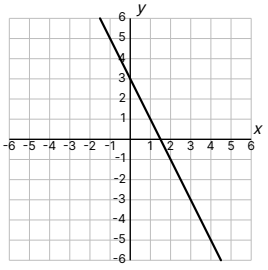

d)

e)

f)

★ Extension

5. These tables do not show $x = 0$. Find the equation of the line for each table.

a)

x	1	2	3	4	5
y	5	7	9	11	13

b)

x	2	3	4	5	6
y	2	5	8	11	14
