Area of Rectangles, Triangles and Parallelograms

Name _____ Date _____ No calculator Version 1

Scan to practise this topic online

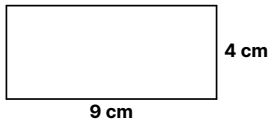

KEY WORDS area *(horahanga)* · square units *(waeine pūrua)* · base *(pūtake)* · perpendicular height *(teitei hāngai)*

A Rectangles and squares ●○○

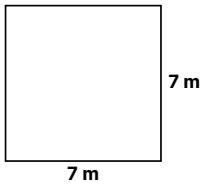

Remember: Area of a rectangle = length × width. Area is measured in squared units, such as cm².

1. Find the area of each shape.

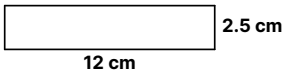

a)

b)

c)

2. Find the area of:

a) A rectangle 15 cm by 6 cm

b) A square with sides of 11 mm

c) A rectangle 2.5 m by 4 m

d) A square with sides of 1.5 m

e) A rectangle 20 cm by 0.5 cm

f) A rectangle 30 m by 12 m

B Working backwards ●●○

3. Find the missing length.

a) A rectangle has an area of 48 cm² and a length of 8 cm. Find its width.

b) A rectangle has an area of 105 m² and a length of 15 m. Find its width.

c) A square has an area of 81 cm². Find the length of its sides.

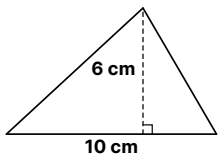

d) A square has an area of 144 m². Find the length of its sides.

C Triangles ●●○

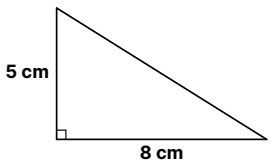

Remember: Area of a triangle $= \frac{1}{2} \times \text{base} \times \text{height}$. The height must be at right angles to the base.

4. Find the area of each triangle.

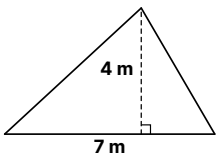

a)

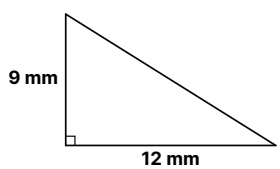

b)

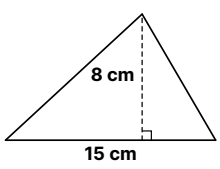

c)

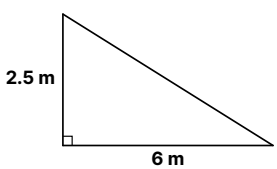

d)

e)

f)

5. Find the area of:

a) A triangle with base 20 cm and height 7 cm

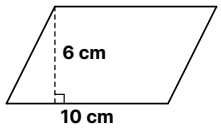

b) A triangle with base 3.6 m and height 5 m

D Parallelograms ●●○

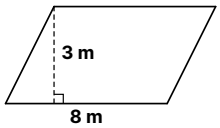

⚠ **Watch out:** Use the perpendicular height (shown with a right angle), not the sloping side.

6. Find the area of each parallelogram.

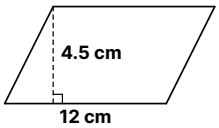

a)

b)

c)

7. Find the area of:

a) A parallelogram with base 15 mm and height 8 mm

b) A parallelogram with base 6.5 m and height 4 m

E Problems ●●●

8. A triangular sail has a base of 4 m and a height of 6.5 m. Find its area.

9. A wall is 5 m long and 2.4 m high. One litre of paint covers 6 m². How many litres are needed to paint the wall once?

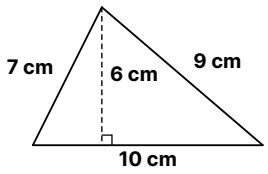

10. A lawn is a rectangle 15 m by 8 m. A rectangular garden 3 m by 2 m is dug in the middle of it. Find the area of lawn that is left.

11. A triangle has an area of 30 cm² and a base of 12 cm. Find its height.

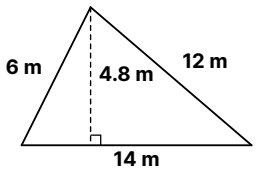

★ Extension

12. These triangles have more measurements than you need. Find the area of each one.

a)

b)

a)

b)

c)

2. Find the area of:

a) A rectangle 14 cm by 7 cm

b) A square with sides of 12 mm

c) A rectangle 3.5 m by 6 m

d) A square with sides of 2.5 m

e) A rectangle 40 cm by 0.5 cm

f) A rectangle 20 m by 15 m

B Working backwards ●●○

3. Find the missing length.

a) A rectangle has an area of 54 cm² and a length of 9 cm. Find its width.

b) A rectangle has an area of 96 m² and a length of 16 m. Find its width.

c) A square has an area of 64 cm². Find the length of its sides.

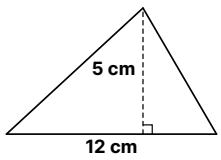

d) A square has an area of 121 m². Find the length of its sides.

C Triangles ●●○

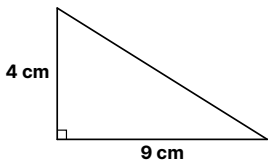

Remember: Area of a triangle $= \frac{1}{2} \times \text{base} \times \text{height}$. The height must be at right angles to the base.

4. Find the area of each triangle.

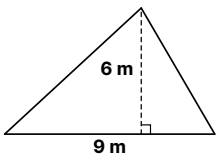

a)

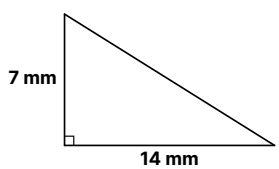

b)
