KEY WORDS prism *(poro)* · pyramid *(koeko tapawhā)* · base *(pūtake)* · face *(mata)* · edge *(tapa)* · vertex *(pito)*

A Prism or pyramid? ●○○

Remember: A prism has two ends that are exactly the same, joined by rectangles. A pyramid has one base, and its other faces are triangles that meet at a point.

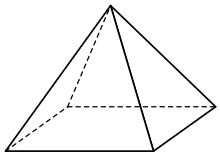

1. Is each solid a prism or a pyramid?

a)

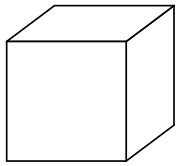

_____

b)

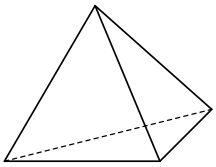

_____

c)

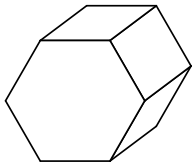

_____

d)

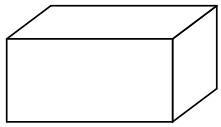

_____

e)

_____

f)

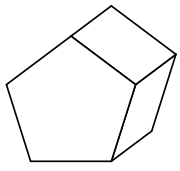

_____

B Naming prisms and pyramids ●●○

Remember: A prism is named after the shape of its ends, and a pyramid is named after the shape of its base. A prism with triangles at its ends is a triangular prism.

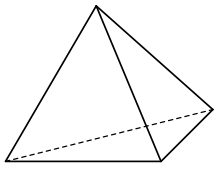

2. Name each solid.

a)

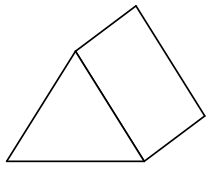

_____

b)

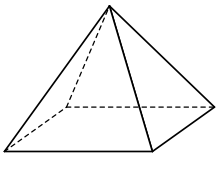

_____

c)

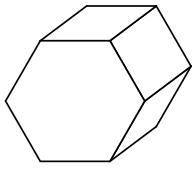

_____

d)

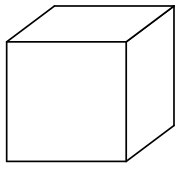

_____

e)

_____

f)

_____

C Faces, edges and vertices ●●○

> **Remember:** A face is a flat surface. An edge is a line where two faces meet. A vertex is a corner, where edges meet. Remember to count the parts you cannot see.

3. Complete the table.

Solid	Faces	Edges	Vertices
Cube			
Triangular prism			
Square pyramid			
Triangular pyramid			
Pentagonal prism			

D The shapes of the faces ●●●

4. Answer each question.

a) What shapes are the faces of a triangular prism?

b) What shapes are the faces of a square pyramid?

c) What shapes are the faces of a cube?

d) What shapes are the faces of a hexagonal prism?

E Which solid am I? ●●●

5. Name the prism or pyramid that fits each description.

a) I have 5 faces, 8 edges and 5 vertices.

b) I have 5 faces, 9 edges and 6 vertices.

c) I have 4 faces, 6 edges and 4 vertices.

d) I have 8 faces, 18 edges and 12 vertices.

★ Extension

6. The ends of a prism are octagons (shapes with 8 sides). How many faces, edges and vertices does the prism have?

7. A pyramid has 7 faces. What shape is its base?

Remember: A face is a flat surface. An edge is a line where two faces meet. A vertex is a corner, where edges meet. Remember to count the parts you cannot see.

3. Complete the table.

Solid	Faces	Edges	Vertices
Rectangular prism			
Square pyramid			
Triangular prism			
Triangular pyramid			
Hexagonal prism			

D The shapes of the faces ●●●

4. Answer each question.

a) What shapes are the faces of a square pyramid?

b) What shapes are the faces of a triangular prism?

c) What shapes are the faces of a triangular pyramid?

d) What shapes are the faces of a pentagonal prism?

E Which solid am I? ●●●

5. Name the prism or pyramid that fits each description.

a) I have 5 faces, 9 edges and 6 vertices.

b) I have 5 faces, 8 edges and 5 vertices.

c) I have 7 faces, 15 edges and 10 vertices.

d) I have 4 faces, 6 edges and 4 vertices.

★ Extension

6. The ends of a prism are decagons (shapes with 10 sides). How many faces, edges and vertices does the prism have?

7. A pyramid has 6 faces. What shape is its base?
