Area

Name _____ Date _____ No calculator Version 1 Scan to practise this topic online

KEY WORDS area *(horahanga)* · square units *(waeine pūrua)* · length *(roa)* · width *(whānui)* · perimeter *(paenga)*

A Rectangles and squares ●○○

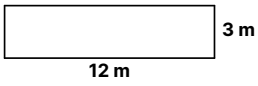

Remember: Area is the amount of space inside a shape, measured in square units such as cm². For a rectangle, area = length × width.

1. Find the area of each rectangle.

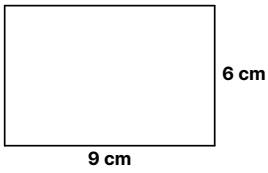

a)

b)

c)

2. Find the area of:

a) A square with sides of 7 cm

b) A rectangle 15 m by 6 m

c) A square with sides of 10 m

d) A rectangle 20 cm by 8 cm

e) A square with sides of 12 mm

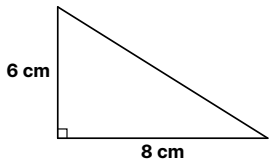

f) A rectangle 25 m by 4 m

B Right-angled triangles ●●○

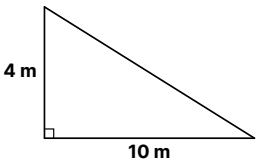

Remember: A right-angled triangle is half of a rectangle. Multiply the two sides that meet at the right angle, then halve the answer.

3. Find the area of each triangle.

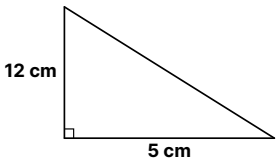

a)

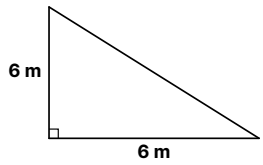

b)

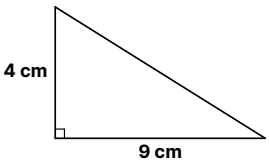

c)

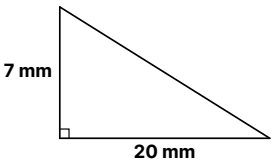

d)

e)

f)

C Missing lengths ●●●

> **Remember:** Work backwards. If area = length × width, then width = area ÷ length.

4. Answer each question.

a) A rectangle has an area of 54 cm² and a length of 9 cm. Find its width.

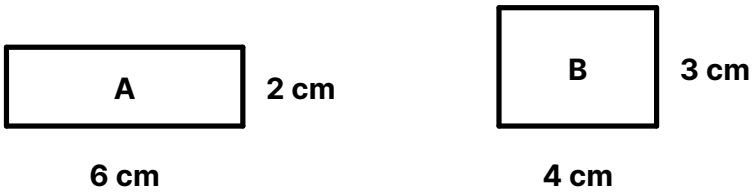

b) A square has an area of 49 cm². Find the length of its sides.

c) A rectangle has an area of 120 m² and a length of 10 m. Find its width.

d) A square has an area of 100 m². Find the length of its sides.

D Same area, different perimeter ●●●

5. Here are two rectangles, A and B.

a) Find the area of A.

b) Find the area of B.

c) Find the perimeter of A.

d) Find the perimeter of B.

e) What do you notice?

6. Write the length and width of three different rectangles that each have an area of 24 cm². Use whole numbers of centimetres.

E Area or perimeter? ●●●

> **Remember:** Perimeter is the distance around the edge (fences, borders, frames). Area is the space covered (carpet, paint, grass).

7. Decide whether each problem needs the area or the perimeter, then work it out.

a) A fence is put all the way around a garden that is 8 m long and 5 m wide. How long is the fence?

b) Carpet is laid in a room that is 4 m long and 3 m wide. How much carpet is needed?

c) A farmer sows grass seed on a paddock that is 60 m long and 40 m wide. What size is the paddock?

d) Tape is stuck around the edge of a rug that is 3 m long and 2 m wide. How much tape is needed?

★ Extension

8. A rectangular lawn is 12 m long and 8 m wide. A square flower bed with sides of 3 m is cut out of it. Find the area of grass that is left.

9. A rectangular wall is 6 m long and 4 m high. Paint costs $12 for each square metre. How much does it cost to paint the wall?
