Dividing with Remainders

Name _____ Date _____ No calculator Version 1 Scan to practise this topic online

KEY WORDS divide *(whakawehe)* · quotient *(otinga whakawehe)* · remainder *(toenga)* · fraction *(hautanga)*

A Dividing exactly ●○○

Remember: Check a division by multiplying back: $96 \div 4 = 24$ because $24 \times 4 = 96$.

1. Work out.

a) $96 \div 4$ **b)** $84 \div 6$ **c)** $135 \div 5$ **d)** $156 \div 3$

e) $224 \div 7$ **f)** $312 \div 8$ **g)** $567 \div 9$ **h)** $1{,}206 \div 6$

i) $450 \div 2$ **j)** $369 \div 3$ **k)** $1{,}000 \div 8$ **l)** $2{,}500 \div 4$

B Dividing with a remainder ●●○

Remember: The remainder is what is left over. $17 \div 5 = 3$ remainder 2, because $3 \times 5 = 15$ and there are 2 left over. The remainder is always smaller than the number you divide by.

2. Work out. Give each answer with a remainder.

a) $17 \div 5$ **b)** $29 \div 3$ **c)** $50 \div 7$ **d)** $38 \div 4$

e) $65 \div 6$ **f)** $100 \div 8$ **g)** $47 \div 9$ **h)** $83 \div 2$

i) $125 \div 4$ **j)** $317 \div 5$ **k)** $1{,}000 \div 7$ **l)** $2{,}345 \div 6$

C Dividing larger numbers ●●●

3. Work out. Some of these have a remainder and some do not.

a) $4{,}526 \div 3$ **b)** $7{,}248 \div 6$ **c)** $9{,}135 \div 4$ **d)** $12{,}345 \div 5$

e) $20{,}406 \div 7$ **f)** $31{,}572 \div 8$ **g)** $45{,}000 \div 9$ **h)** $60{,}125 \div 2$

D Remainders as fractions and decimals ●●●

Watch out: A remainder is not a decimal. $27 \div 4$ is 6 remainder 3, which is $6\frac{3}{4}$ or 6.75. It is not 6.3.

4. Write each answer as a mixed number in its simplest form.

a) $17 \div 5$ **b)** $29 \div 3$ **c)** $50 \div 7$ **d)** $38 \div 4$

e) $65 \div 6$ **f)** $47 \div 9$

5. Write each answer as a decimal.

a) $27 \div 4$ **b)** $45 \div 2$ **c)** $34 \div 5$ **d)** $51 \div 4$

e) $93 \div 6$ **f)** $23 \div 10$

E What to do with the remainder ●●●

> **Remember:** Read the question again after you divide. Sometimes you round up, sometimes you round down, and sometimes the remainder itself is the answer.

6. Answer each question.

a) 53 children are going on a trip in cars. Each car takes 6 children. How many cars are needed?

b) Eggs are packed in boxes of 8. How many full boxes can be made from 50 eggs?

c) 38 lollies are shared equally between 4 friends. How many lollies are left over?

d) Pens cost $12 each. How many pens can be bought with $100?

e) 130 students are going to camp. Each bus holds 25 students. How many buses are needed?

f) A baker puts 75 buns into bags of 10. How many buns are left over?

Extension

7. When a number is divided by 5, the answer is 7 remainder 3. What is the number?

8. $45 is shared equally between 4 people. How much does each person get?

KEY WORDS divide *(whakawehe)* · quotient *(otinga whakawehe)* · remainder *(toenga)* · fraction *(hautanga)*

A Dividing exactly ●○○

Remember: Check a division by multiplying back: $96 \div 4 = 24$ because $24 \times 4 = 96$.

1. Work out.

a) $92 \div 4$ **b)** $78 \div 6$ **c)** $145 \div 5$ **d)** $174 \div 3$

e) $238 \div 7$ **f)** $296 \div 8$ **g)** $585 \div 9$ **h)** $1{,}608 \div 8$

i) $650 \div 2$ **j)** $396 \div 3$ **k)** $1{,}000 \div 4$ **l)** $3{,}500 \div 5$

B Dividing with a remainder ●●○

Remember: The remainder is what is left over. $17 \div 5 = 3$ remainder 2, because $3 \times 5 = 15$ and there are 2 left over. The remainder is always smaller than the number you divide by.

2. Work out. Give each answer with a remainder.

a) $19 \div 5$ **b)** $26 \div 3$ **c)** $45 \div 7$ **d)** $42 \div 4$

e) $57 \div 6$ **f)** $100 \div 9$ **g)** $58 \div 8$ **h)** $95 \div 2$

i) $135 \div 4$ **j)** $418 \div 5$ **k)** $1{,}000 \div 6$ **l)** $3{,}456 \div 7$

C Dividing larger numbers ●●●

3. Work out. Some of these have a remainder and some do not.

a) $5{,}627 \div 3$ **b)** $8{,}346 \div 6$ **c)** $7{,}253 \div 4$ **d)** $23{,}455 \div 5$

e) $30{,}608 \div 7$ **f)** $42{,}684 \div 8$ **g)** $54{,}000 \div 9$ **h)** $70{,}135 \div 2$

D Remainders as fractions and decimals ●●●

Watch out: A remainder is not a decimal. $27 \div 4$ is 6 remainder 3, which is $6\frac{3}{4}$ or 6.75. It is not 6.3.

4. Write each answer as a mixed number in its simplest form.

a) $19 \div 5$ **b)** $26 \div 3$ **c)** $45 \div 7$ **d)** $42 \div 4$

e) $57 \div 6$ **f)** $58 \div 9$

5. Write each answer as a decimal.

a) $23 \div 4$ **b)** $57 \div 2$ **c)** $43 \div 5$ **d)** $49 \div 4$

e) $87 \div 6$ **f)** $37 \div 10$

E What to do with the remainder ●●●

> **Remember:** Read the question again after you divide. Sometimes you round up, sometimes you round down, and sometimes the remainder itself is the answer.

6. Answer each question.

a) 47 children are going on a trip in cars. Each car takes 5 children. How many cars are needed?

b) Eggs are packed in boxes of 7. How many full boxes can be made from 60 eggs?

c) 45 lollies are shared equally between 6 friends. How many lollies are left over?

d) Pens cost $15 each. How many pens can be bought with $100?

e) 140 students are going to camp. Each bus holds 30 students. How many buses are needed?

f) A baker puts 85 buns into bags of 10. How many buns are left over?

Extension

7. When a number is divided by 6, the answer is 8 remainder 4. What is the number?

8. $54 is shared equally between 4 people. How much does each person get?
