A Dollars and cents ●○○

⚠ **Watch out:** There are 100 cents in a dollar. Money always has two digits after the point: 250 cents is \$2.50, not \$2.5.

1. Write each amount in dollars.

a) 250 cents = _____ **b)** 475 cents = _____ **c)** 80 cents = _____ **d)** 305 cents = _____

e) 1,260 cents = _____ **f)** 5 cents = _____ **g)** 990 cents = _____ **h)** 2,000 cents = _____

2. Write each amount in cents.

a) \$1.50 = _____ **b)** \$3.25 = _____ **c)** \$0.70 = _____ **d)** \$6.05 = _____

B Total cost and change ●●○

Remember: Line up the decimal points when you add or subtract money. Change = the money you pay with minus the total cost.

3. Answer each question.

a) Two items cost \$3.50 and \$2.25. What is the total cost?

b) A bill of \$6.40 is paid with a \$10 note. How much change is given?

c) Four pens cost \$2.50 each. What is the total cost?

d) Three items cost \$3.20, \$5.50 and \$1.30. They are paid for with a \$20 note. How much change is given?

e) Mia buys 3 pies at \$4 each and 2 drinks at \$2.50 each. What is the total cost?

f) Tane buys 5 apples at \$1.20 each and pays with a \$10 note. How much change does he get?

C Percentages of money ●●○

Remember: 50% is a half, 25% is a quarter and 10% is a tenth. So 10% of \$45 is $45 \div 10 = 4.5$, which is \$4.50.

4. Work out.

a) 50% of \$30 **b)** 10% of \$80 **c)** 25% of \$40 **d)** 50% of \$9

e) 10% of \$45 **f)** 25% of \$10 **g)** 20% of \$60 **h)** 10% of \$6

D Is there enough money? ●●●

> **Remember:** Add up the prices first. Then compare the total with the money you have.

5. Answer each question. If there is enough money, say how much is left over. If there is not, say how much more is needed.

a) Mia has $20 and wants to buy things that cost NaN7 + NaN6 + NaN5. Is that enough money?

b) Tane has $10 and wants to buy things that cost NaN4 + NaN3 + NaN2. Is that enough money?

c) Ana has $50 and wants to buy things that cost NaN1 + NaN2 + NaN4. Is that enough money?

d) Ben has $15 and wants to buy things that cost NaN8 + NaN2 + NaN3. Is that enough money?

E Problems ●●●

6. Kiri saves $12 each week for 5 weeks. How much more does she need to buy a bike that costs $100?

7. A family of 6 goes to the pool. It costs $4.50 for each person. How much do they pay altogether?

8. A $40 pair of shoes has 25% taken off in a sale. What is the sale price?

★ Extension

9. Which is the better buy: a pack of 3 pens for $4.50, or a pack of 5 pens for $7? Show your working.

10. New Zealand coins are 10c, 20c, 50c, $1 and $2. What is the smallest number of coins that makes $3.70?
