Scan to practise this topic online

KEY WORDS acute *(koki whāiti)* · obtuse *(koki whānui)* · reflex *(koki hurikōaro)* · complementary · supplementary

A Types of angles ●○○

Remember: Acute: less than 90°. Right angle: 90°. Obtuse: between 90° and 180°. Straight angle: 180°. Reflex: more than 180°.

1. Write the type of each angle.

a) 35° _____ **b)** 90° _____ **c)** 120° _____ **d)** 180° _____

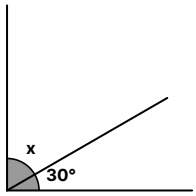

e) 270° _____ **f)** 89° _____ **g)** 91° _____ **h)** 300° _____

B Complementary angles ●○○

Remember: Complementary angles add to 90°. Together they make a right angle.

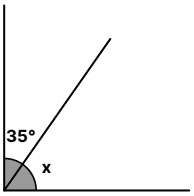

2. The two angles make a right angle. Find the size of the angle marked x.

a)

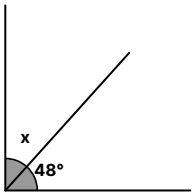

_____

b)

_____

c)

_____

3. Find the angle that is complementary to each of these.

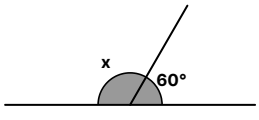

a) 35° _____ **b)** 60° _____ **c)** 8° _____ **d)** 71° _____

C Supplementary angles ●●○

Remember: Supplementary angles add to 180°. Angles on a straight line are supplementary.

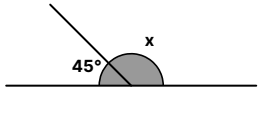

4. Find the size of the angle marked x.

a)

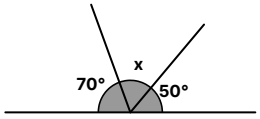

_____

b)

_____

c)

_____

5. Find the angle that is supplementary to each of these.

a) 35° _____ **b)** 120° _____ **c)** 90° _____ **d)** 153° _____

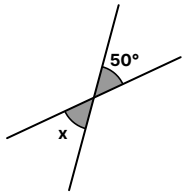

© 2026 Cell Tuition. You may print and photocopy this worksheet for your own classes and children. It may not be changed, sold or posted on other websites.

D Vertically opposite angles ●●○

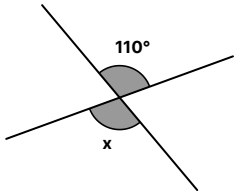

> **Remember:** When two straight lines cross, the angles opposite each other are equal.

6. Find the size of the angle marked x.

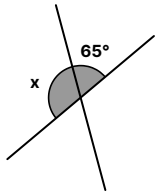

a)

b)

c)

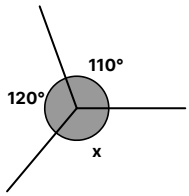

E Angles at a point ●●●

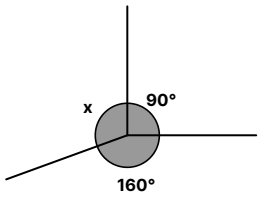

> **Remember:** Angles that go all the way around a point add to 360°.

7. Find the size of the angle marked x.

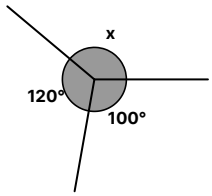

a)

b)

c)

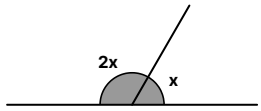

F Unknown angles with equations ●●●

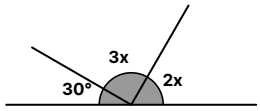

> **Remember:** Write an equation using the angle rule, then solve it. If x and $2x$ are on a straight line, then $x + 2x = 180$.

8. Write an equation and solve it to find x.

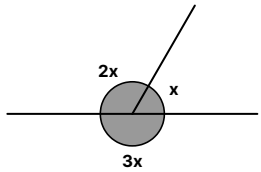

a)

b)

c)

★ Extension

9. Two angles are complementary. One of them is 40°. A third angle is supplementary to the other one. Find the size of the third angle.

10. Can two obtuse angles be supplementary? Explain.
