Angles on Parallel Lines

Name _____ Date _____ No calculator Version 1

Scan to practise this topic online

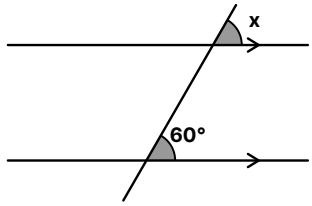

KEY WORDS parallel *(whakarara)* · transversal *(rārangi whakawhiti)* · corresponding *(koki hāngai-rite)*

A Corresponding angles ●○○

Remember: Corresponding angles are in the same position at each crossing. On parallel lines they are equal. Look for an F shape.

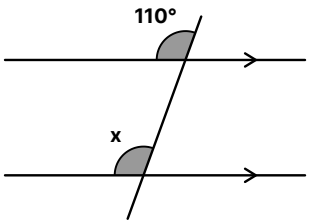

1. The arrows show that the lines are parallel. Find the size of the angle marked x.

a)

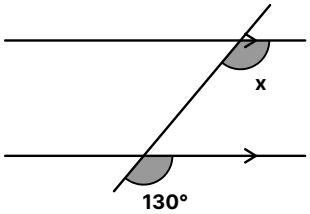

_____

b)

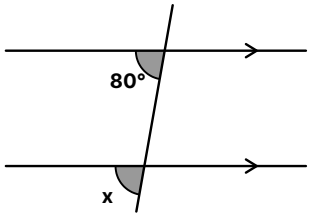

_____

c)

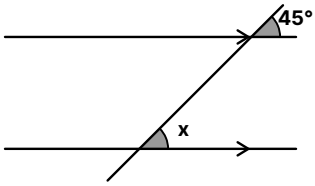

_____

d)

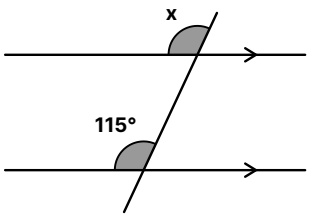

_____

e)

_____

f)

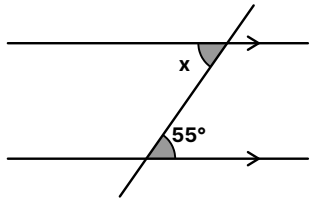

_____

B Alternate angles ●●○

Remember: Alternate angles are between the parallel lines, on opposite sides of the line that crosses them. They are equal. Look for a Z shape.

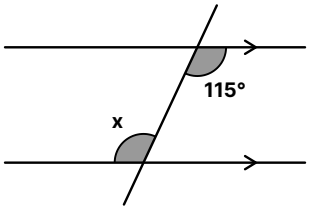

2. Find the size of the angle marked x.

a)

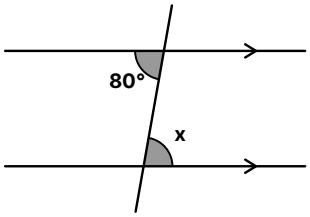

_____

C Co-interior angles ●●○

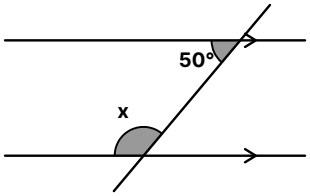

Remember: Co-interior angles are between the parallel lines, on the same side of the line that crosses them. They add to 180°. Look for a C shape.

3. Find the size of the angle marked x.

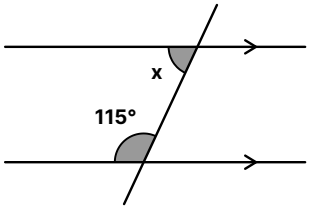

a)

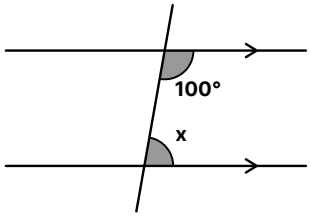

b)

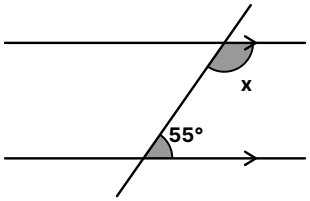

c)

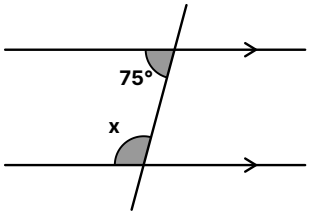

d)

e)

f)

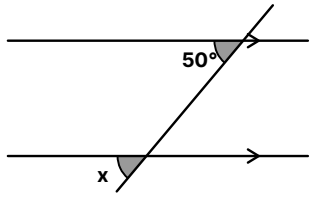

D Choosing the rule ●●●

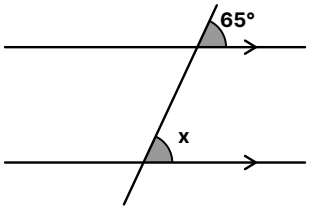

Watch out: Always give a reason. Say which rule you used: corresponding, alternate, co-interior, vertically opposite, or angles on a straight line.

4. Find the size of the angle marked x. Give a reason for each answer.

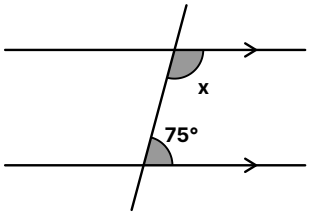

a)

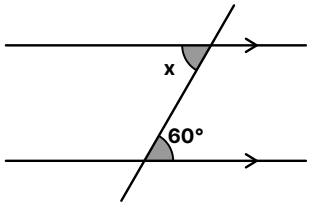

b)

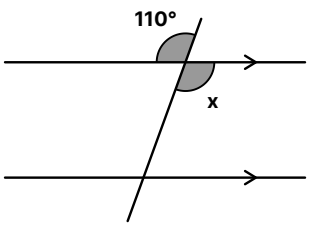

c)

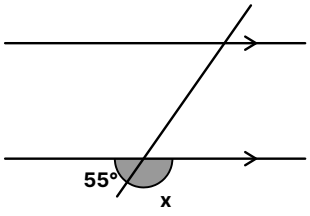

d)

e)

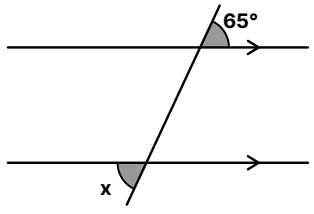

f)

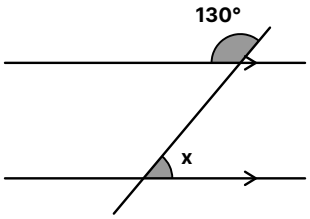

Extension

5. Find the size of the angle marked x. You will need two rules. Give your reasons.

a)

b)
