Money: Discounts, Change and Costs

Name _____ Date _____ Calculator allowed Version 1 Scan to practise this topic online

KEY WORDS discount *(whakahekenga utu)* · sale price · total *(tapeke)* · change · cash rounding · weekly

A Percentage discounts ●●○

⚠ **Watch out:** The discount is the amount taken off. The sale price is what you pay: the price minus the discount.

1. Find the sale price.

a) $60 with 10% off **b)** $40 with 25% off **c)** $85 with 20% off

d) $180 with 35% off **e)** $250 with 12% off **f)** $64 with 15% off

g) $19.90 with 50% off **h)** $120 with 30% off **i)** $45 with 40% off

B Cost and change ●○○

2. Answer each question.

a) Two items cost $7.45 and $12.80. What is the total cost?

b) A bill of $32.60 is paid with a $50 note. How much change is given?

c) Four pens cost $2.35 each. They are paid for by card. How much is paid?

d) Three items cost $3.20, $5.75 and $1.90. They are paid for with a $20 note. How much change is given?

C Cash rounding ●●○

💡 **Remember:** There are no coins smaller than 10 cents, so a cash total is rounded to the nearest 10 cents. Round the total, not each item. Card payments are not rounded.

3. Each total is paid in cash. Write the amount that is paid.

a) $23.42 _____ **b)** $8.78 _____ **c)** $15.04 _____ **d)** $6.69 _____

e) $41.21 _____ **f)** $0.87 _____ **g)** $19.96 _____ **h)** $5.60 _____

D Paying in cash ●●●

⚠ **Watch out:** Round the total, not each item. Only round when the payment is in cash.

4. Answer each question.

a) Three items cost $4.99 each. They are paid for together in cash. What amount is paid?

b) Items cost $2.49, $3.99 and $1.23. They are paid for together in cash. What amount is paid?

c) A total of $16.57 is paid in cash with a $20 note. How much change is given?

d) Twelve items cost $0.99 each. They are paid for together in cash with a $20 note. How much change is given?

E Weekly, monthly and yearly costs ●●○

⚠ **Watch out:** A year has 52 weeks and 12 months. Do not use 4 weeks for every month to find a yearly cost: 12×4 is only 48 weeks.

5. Answer each question.

a) A club costs $30 a month. How much does it cost for a year?

b) Bus fares cost $12.50 a week. How much do they cost for a year of 52 weeks?

c) Insurance costs $1,200 a year. How much is this each month?

d) A sports fee is $520 a year. How much is this each week?

e) A phone plan costs $45 a month. How much does it cost over 2 years?

f) Kai saves $25 a week. How many weeks will it take him to save $300?

g) Mele gets $20 pocket money a week. She spends $12.50 and saves the rest. How much has she saved after 10 weeks?

F Comparing plans ●●●

💡 **Remember:** Compare the plans over the same length of time, and remember to add any extra charges.

6. Plan A costs $20 a month plus $5 for each gigabyte of data. Plan B costs $45 a month with unlimited data.

a) Find the cost of Plan A for a month in which 4 gigabytes are used.

b) Which plan is cheaper for 7 gigabytes in a month, and by how much?

c) For how many gigabytes in a month do the two plans cost the same?

7. One gym charges $18 a week. Another gym charges $75 a month. Which gym is cheaper over a year of 52 weeks, and by how much?

8. Deal 1: pay $600 for a phone and then $20 a month. Deal 2: pay nothing for the phone and then $50 a month. Which deal is cheaper over 24 months, and by how much?

Extension

9. A streaming service costs $14.99 a month, or $150 if you pay for a whole year at once. How much do you save in a year by paying yearly?

10. A pool charges $15 a visit, or $50 for a monthly pass. What is the smallest number of visits in a month that makes the pass the cheaper choice?

11. Which is cheaper: a $80 jacket at 25% off, or a $90 jacket at 30% off?
