# Percentages of Amounts

Name _____ Date _____ No calculator Version 1

Scan to practise this topic online

**KEY WORDS** percentage *(ōrau)* · per cent *(ōrau)* · of · the whole (100%) · increase *(pikinga)*

## A Easy percentages ●○○

**Remember:** 50% is a half, 25% is a quarter, 10% is a tenth and 1% is a hundredth. So 10% of 70 is $70 \div 10 = 7$.

**1.** Work out.

**a)** 50% of 60 = _____ **b)** 25% of 80 = _____ **c)** 10% of 70 = _____ **d)** 1% of 300 = _____

**e)** 20% of 45 = _____ **f)** 75% of 40 = _____ **g)** 5% of 120 = _____ **h)** 10% of 65 = _____

**i)** 50% of 37 = _____ **j)** 25% of 10 = _____ **k)** 1% of 450 = _____ **l)** 5% of 60 = _____

## B Any percentage ●●○

**Remember:** Find 10% or 1% first, then multiply. For 30% of 60: 10% is 6, so 30% is $6 \times 3 = 18$. For 12% of 50: 1% is 0.5, so 12% is $0.5 \times 12 = 6$.

**2.** Work out.

**a)** 30% of 60 **b)** 70% of 40 **c)** 15% of 80 **d)** 35% of 200

**e)** 12% of 50 **f)** 8% of 300 **g)** 45% of 120 **h)** 3% of 700

**i)** 60% of 45 **j)** 17% of 200 **k)** 90% of 150 **l)** 125% of 40

**m)** 2% of 850 **n)** 40% of 65 **o)** 11% of 300 **p)** 150% of 12

**3.** Work out.

**a)** 10% of \$45 **b)** 25% of \$18 **c)** 30% of 250 g **d)** 5% of 40 kg

**e)** 15% of \$60 **f)** 70% of 300 mL **g)** 4% of 150 m **h)** 60% of \$7.50

## C Finding the whole ●●●

⚠ **Watch out:** Do not find the percentage of the number you are given. Work back to 100%: if 20% of a number is 8, then 100% is $8 \times 5 = 40$.

**4.** Find the number.

**a)** 50% of a number is 14 **b)** 10% of a number is 7 **c)** 25% of a number is 9

**d)** 20% of a number is 8 **e)** 5% of a number is 3 **f)** 1% of a number is 2.5

**g)** 30% of a number is 12 **h)** 75% of a number is 60 **i)** 40% of a number is 18

**j)** 15% of a number is 9 **k)** 60% of a number is 42 **l)** 8% of a number is 20

## D Percentage increase and decrease ●●●

> ⚠ **Watch out:** The question asks for the new amount, not just the change. Work out the change, then add it on or take it off.

**5.** Increase:

**a)** 80 by 10% **b)** 60 by 25% **c)** 200 by 15% **d)** 45 by 20%

**e)** 150 by 30% **f)** 64 by 50% **g)** 500 by 4% **h)** 36 by 75%

**6.** Decrease:

**a)** 90 by 10% **b)** 120 by 25% **c)** 400 by 5% **d)** 65 by 20%

**e)** 250 by 30% **f)** 84 by 50% **g)** 300 by 12% **h)** 48 by 75%

## E Problems ●●●

**7.** A test has 40 questions. Kiri gets 80% of them right. How many questions does she get right?

**8.** A jacket costs $60. In a sale it is 25% off. What is the sale price?

**9.** A town has 2,400 people. Next year the number of people is expected to go up by 5%. How many people is that?

**10.** 15 students in a class walk to school. This is 60% of the class. How many students are in the class?

**11.** A 250 g bar of chocolate is 8% fat. How many grams of fat are in the bar?

**12.** A farmer has 40 cows. 30% of them have been milked. How many cows have not been milked yet?

## ★ Extension

**13.** $a\%$ of $b$ is always the same as $b\%$ of $a$. Use this to work out 4% of 75 in your head.

**14.** Increase 200 by 10%. Then decrease your answer by 10%. Do you get back to 200? Explain.
