KEY WORDS mean *(toharite)* · median *(tau waenga)* · mode *(tau auau)* · range *(whānuitanga)* · average *(toharite)*

A The mean ●○○

Remember: To find the mean, add all the values and divide by how many there are.

1. Find the mean of each set of data.

a) 4, 7, 9, 12

b) 6, 8, 3, 10, 13

c) 15, 20, 25, 18, 22, 20

d) 2.5, 3.5, 4, 6

e) −3, 5, 0, 8, −5

f) 120, 135, 150, 140, 130, 165, 140

B The median and the mode ●○○

Watch out: Put the values in order before you find the median. If there are two middle values, the median is halfway between them.

2. Find the median of each set of data.

a) 7, 3, 9, 5, 8

b) 12, 15, 11, 18, 14, 20

c) 4, 9, 2, 9, 6, 1, 7

d) 3.5, 1.2, 4.8, 2.6

e) −2, 5, −6, 0, 3

f) 30, 25, 40, 35, 25, 50, 45, 20

3. Find the mode of each set of data.

a) 3, 5, 5, 7, 8, 5, 2

b) 10, 12, 12, 14, 15, 15, 18

c) 4, 6, 8, 10, 12

d) 1.5, 2, 1.5, 3, 2.5, 1.5

C The range ●○○

Remember: The range is the largest value minus the smallest value. It shows how spread out the data is.

4. Find the range of each set of data.

a) 4, 9, 2, 15, 7

b) 23, 41, 38, 19, 27, 35

c) 1.2, 3.5, 0.8, 2.6

d) −4, 3, 7, −9, 0

D All four measures ●●○

5. The numbers of goals scored by a netball team in 8 games were: 22, 31, 27, 22, 35, 29, 22, 28

a) Find the mean.

b) Find the median.

c) Find the mode.

d) Find the range.

© 2026 Cell Tuition. You may print and photocopy this worksheet for your own classes and children. It may not be changed, sold or posted on other websites.

6. The times, in minutes, that 7 students took to walk to school were: 12, 5, 18, 9, 12, 25, 10

a) Find the mean.

b) Find the median.

c) Find the mode.

d) Find the range.

E Using the mean ●●●

Remember: Total = mean × number of values. Find the total first, then subtract the values you know.

7. Answer each question.

a) The mean of 4 numbers is 6. Find the total of the numbers.

b) The mean of 5 numbers is 7.2. Find the total of the numbers.

c) The numbers 6, 9, 7, 10 and one more number have a mean of 8. Find the missing number.

d) The numbers 12, 15, 20 and one more number have a mean of 14. Find the missing number.

e) The numbers 3.5, 4.5, 6 and one more number have a mean of 5. Find the missing number.

F Choosing the best measure ●●●

Remember: One very large or very small value (an outlier) changes the mean a lot, but it hardly changes the median.

8. The weekly pay, in dollars, of the 7 people who work in a small shop is: 600, 620, 640, 650, 660, 680, 1,750

a) Find the mean.

b) Find the median.

c) Which describes a typical worker's pay better, the mean or the median? Give a reason.

9. A shoe shop wants to know which shoe size to order the most of. Which measure should it use: the mean, the median or the mode? Give a reason.

★ Extension

10. The mean of 5 numbers is 10. Another number, 16, is added to the set. Find the new mean.

11. Write down a set of five whole numbers with a median of 7 and a range of 10.
