KEY WORDS coordinates *(taunga)* · x-axis *(tuaka-x)* · y-axis *(tuaka-y)* · origin *(pūtake)*

A Coordinates ●○○

Remember: The first number is how far across (x) and the second is how far up or down (y). The point $(3, -2)$ is 3 right and 2 down.

1. Write the coordinates of each point.

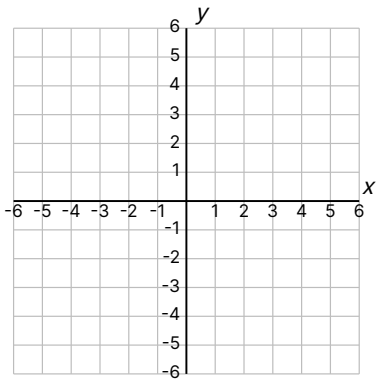

a) A _____ **b)** B _____

c) C _____ **d)** D _____

e) E _____ **f)** F _____

g) G _____ **h)** H _____

2. Plot these points on the grid and label each one with its letter: P $(4,\ 1)$, Q$(-3,\ 2)$, R$(-2,\ -4)$, S$(5,\ -3)$, T$(0,\ 3)$, U$(-5,\ 0)$.

B Tables of values ●●○

Remember: Put each value of x into the equation to find y.

3. Complete the table of values for each line.

a) $y = x + 2$

x	-2	-1	0	1	2
y					

b) $y = 2x$

x	-2	-1	0	1	2
y					

c) $y = 2x - 1$

x	-2	-1	0	1	2
y					

d) $y = -x + 3$

x	-2	-1	0	1	2
y

C Drawing lines ●●●

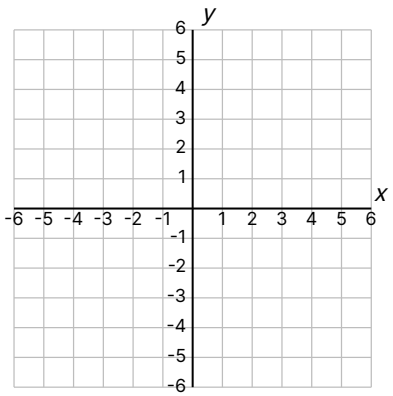

Remember: Make a table of values, plot the points, then rule a straight line through them.

4. Draw each line on its grid.

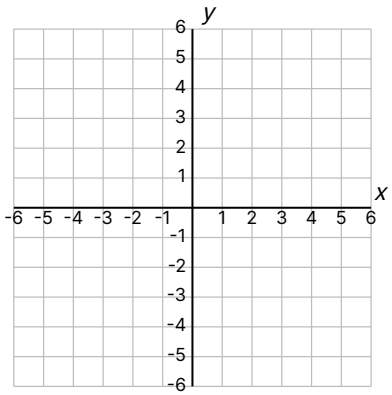

a) $y = x + 2$

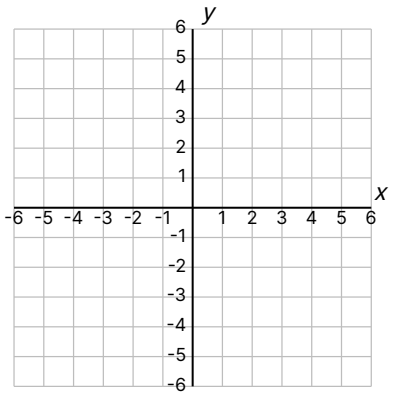

b) $y = 2x$

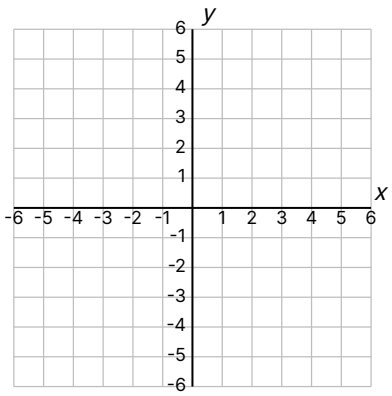

c) $y = 2x - 1$

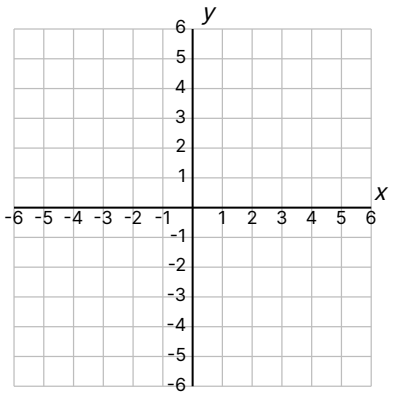

d) $y = -x + 3$

e) $y = x - 4$

f) $y = 3x - 2$

D Gradient and y-intercept ●●○

> **Remember:** In $y = mx + c$, the gradient is m (how steep the line is) and the y-intercept is c (where it crosses the y-axis).

5. Write down the gradient and the y-intercept of each line.

a) $y = 2x + 5$ _____ **b)** $y = 4x - 1$ _____

c) $y = -3x + 2$ _____ **d)** $y = x - 6$ _____

e) $y = 5x$ _____ **f)** $y = \frac{1}{2}x + 3$ _____

g) $y = 7 - 2x$ _____ **h)** $y = -x$ _____

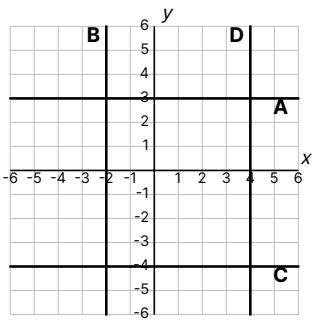

E Horizontal and vertical lines ●●○

> **Remember:** Every point on a horizontal line has the same y value. Every point on a vertical line has the same x value.

6. Write the equation of each line on the graph.

a) Line A _____ **b)** Line B _____

c) Line C _____ **d)** Line D _____

★ Extension

7. Does the point lie on the line? Show your working.

a) $(2,\ 7)$ and $y = 3x + 1$ **b)** $(4,\ 2)$ and $y = 2x - 5$ **c)** $(-1,\ 8)$ and $y = -2x + 6$
