KEY WORDS object *(ahanoa)* · image *(ataata)* · translation *(nekehanga)* · reflection *(whakaata)*

A Translation ●○○

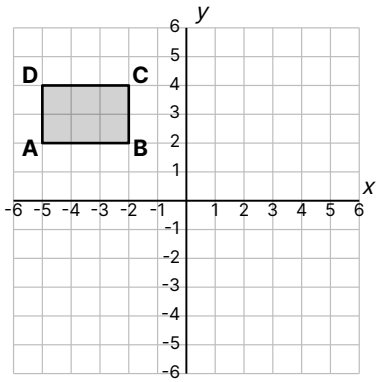

Remember: A translation slides every point the same distance in the same direction. Label the image A′, B′, C′.

1. Draw the image of each shape.

a) Translate the shape 2 units right and 5 units down.

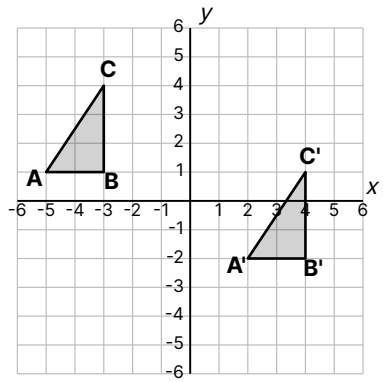

b) Translate the shape 6 units right and 3 units down.

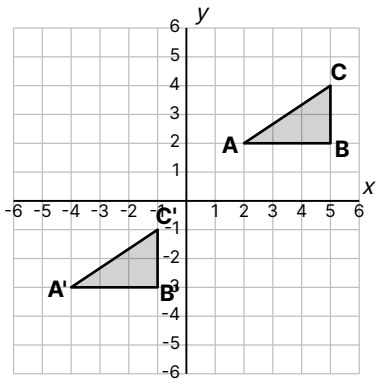

2. Each shape ABC has been translated to A′B′C′. Describe the translation.

a)

_____

b)

_____

B Reflection ●●○

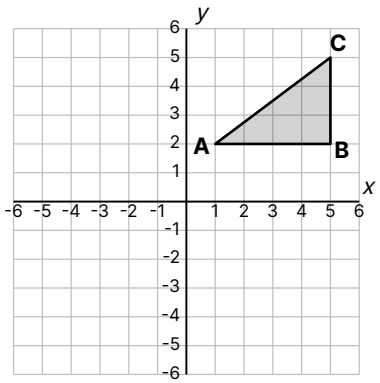

Remember: Each point and its image are the same distance from the mirror line, on opposite sides of it.

3. Draw the image of each shape.

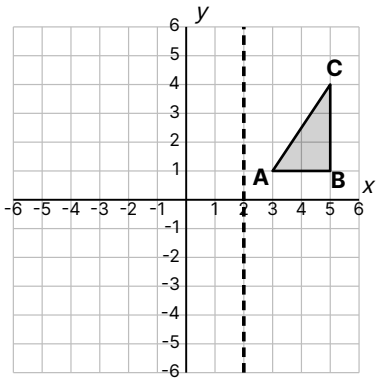

a) Reflect the shape in the y-axis.

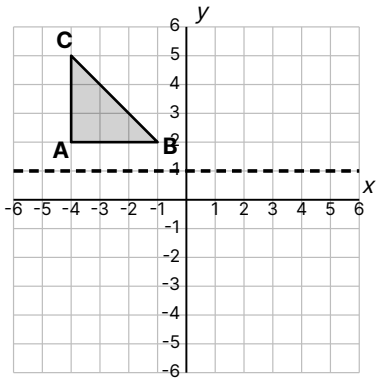

b) Reflect the shape in the x-axis.

c) Reflect the shape in the line $x = 2$ (the dashed line).

d) Reflect the shape in the line $y = 1$ (the dashed line).

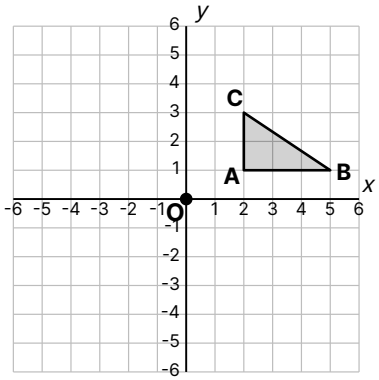

C Rotation ●●●

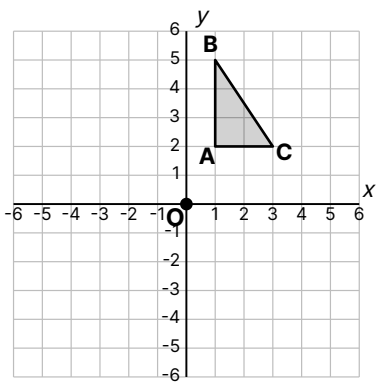

Remember: Every point turns through the same angle about the centre. Tracing paper helps: trace the shape, hold the centre still and turn.

4. Draw the image of each shape.

a) Rotate the shape 180° about the point O.

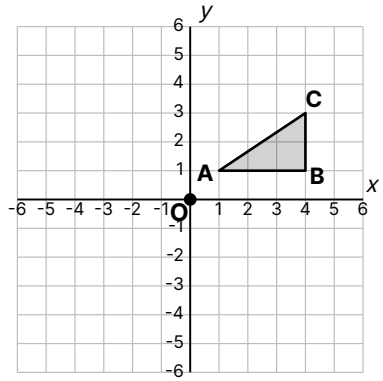

b) Rotate the shape 90° clockwise about the point O.

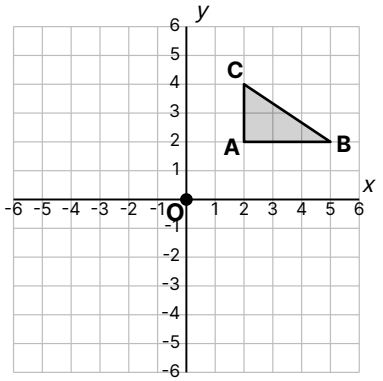

© 2026 Cell Tuition. You may print and photocopy this worksheet for your own classes and children. It may not be changed, sold or posted on other websites.

c) Rotate the shape 90° anticlockwise about the point O.

d) Rotate the shape 90° clockwise about the point O.

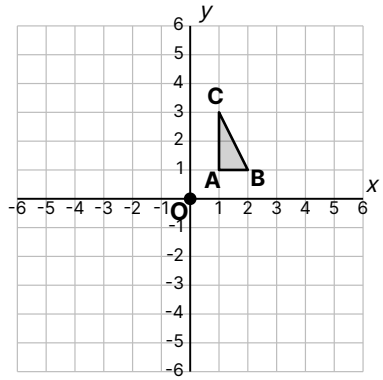

D Enlargement ●●●

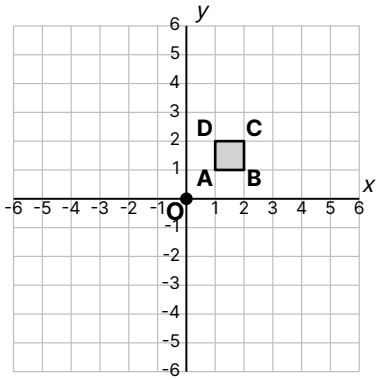

Remember: Multiply the distance from the centre to each point by the scale factor.

5. Draw the image of each shape.

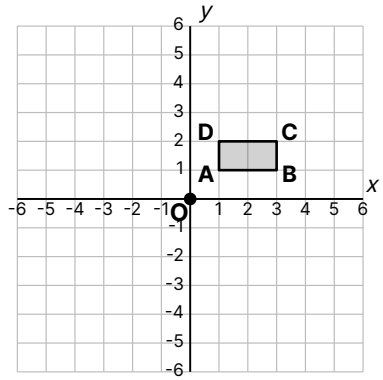

a) Enlarge the shape by a scale factor of 2, with centre O.

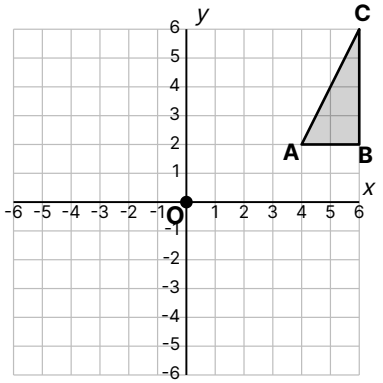

b) Enlarge the shape by a scale factor of 3, with centre O.

c) Enlarge the shape by a scale factor of 2, with centre O.

d) Enlarge the shape by a scale factor of 0.5, with centre O.

E Naming the transformation ●●●

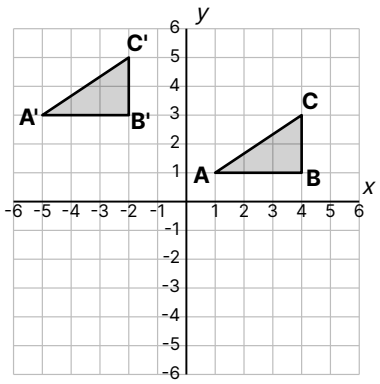

Remember: A translation is a slide, a reflection is a flip, a rotation is a turn and an enlargement is a change of size.

6. Shape ABC has been transformed to A′B′C′. Name the transformation and describe it as fully as you can.

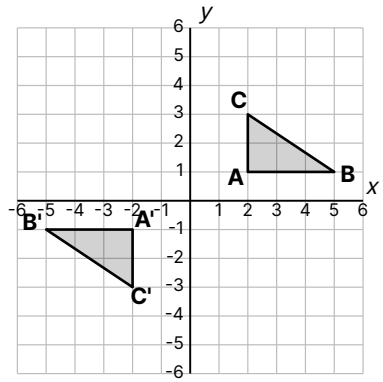

a)

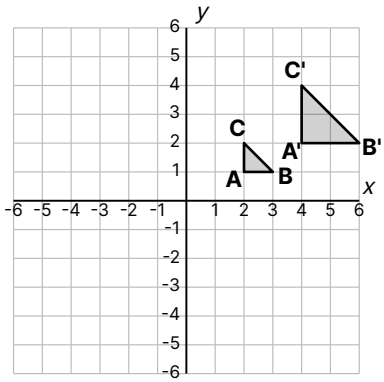

b)

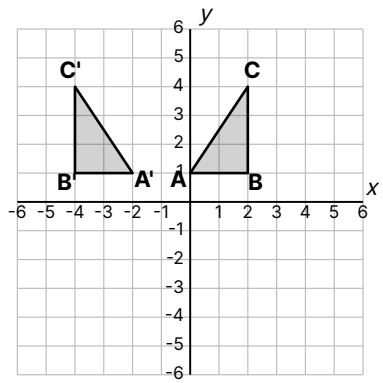

c)

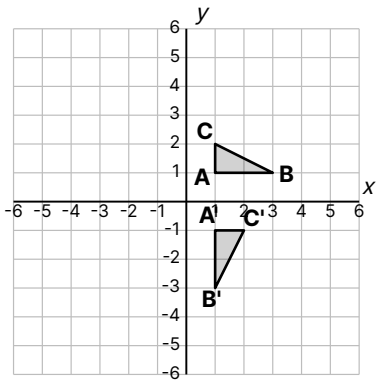

d)

e)

f)

★ Extension

7. Without drawing, write the coordinates of the image of the point $P(4,\ 2)$ after each transformation.

a) Translation 6 left and 1 up _____

b) Reflection in the x-axis _____

c) Reflection in the y-axis _____

d) Rotation of 180° about (0, 0) _____
