KEY WORDS discount *(whakahekenga utu)* · mark-up · GST *(tāke hokohoko (GST))* · inclusive · exclusive

A Discounts ●○○

Remember: For 25% off you pay 75% of the price, so multiply by 0.75.

1. Find the sale price.

a) $80 with 25% off
b) $120 with 10% off
c) $45 with 20% off
d) $250 with 30% off
e) $64 with 50% off
f) $199 with 15% off
g) $18 with 5% off
h) $540 with 40% off
i) $32.50 with 20% off

B Mark-ups ●○○

Remember: A mark-up of 40% means you charge 140% of the cost, so multiply by 1.40.

2. Find the selling price.

a) $50 with a 20% mark-up
b) $36 with a 50% mark-up
c) $120 with a 35% mark-up
d) $8 with a 75% mark-up
e) $240 with a 15% mark-up
f) $65 with a 40% mark-up
g) $2.40 with a 100% mark-up
h) $900 with a 12% mark-up
i) $15.50 with a 60% mark-up

C Adding GST ●●○

Remember: GST in New Zealand is 15%. To add GST to a price, multiply by 1.15.

3. These prices do not include GST. Find the price including GST.

a) $100
b) $60
c) $240
d) $18
e) $450
f) $79
g) $1,200
h) $35.50

D Removing GST ●●●

Watch out: To take GST off a price, divide by 1.15. Do not subtract 15% of the price.

4. These prices include GST. Find the price before GST was added.

a) $115
b) $46
c) $230
d) $92
e) $575
f) $34.50

5. These prices include GST. How much GST is in each price?

a) $115
b) $69
c) $299

E Simple interest ●●○

Remember: Simple interest = amount invested × interest rate (as a decimal) × number of years.

6. Find the simple interest earned.

a) \$500 at 4% per year for 3 years

b) \$1,200 at 5% per year for 2 years

c) \$800 at 3% per year for 5 years

d) \$2,500 at 6% per year for 4 years

e) \$4,000 at 2.5% per year for 3 years

f) \$600 at 8% per year for 18 months

g) \$10,000 at 3.5% per year for 2 years

h) \$750 at 4% per year for 1 year

7. Find the total amount at the end, including the interest.

a) \$1,000 at 5% per year for 2 years

b) \$2,400 at 4% per year for 3 years

c) \$650 at 6% per year for 5 years

d) \$5,000 at 3% per year for 2 years 6 months

F Money problems ●●●

8. A pair of shoes costs \$90 before GST. The shop takes 20% off this price and then adds GST. What does a customer pay?

9. A plumber charges \$40 an hour plus GST. Find the total cost of a job that takes 3 hours.

10. Mia borrows \$1,500 at 4% simple interest per year for 2 years. How much does she pay back altogether?

★ Extension

11. \$600 earns \$72 simple interest in 3 years. Find the interest rate per year.

12. A television costs \$460 including GST. A business can claim the GST back. How much does the television really cost the business?
