B Quartiles ●●○

Remember: The lower quartile (LQ) is the median of the lower half of the data. The upper quartile (UQ) is the median of the upper half. If there is a middle value, leave it out of both halves.

2. These sets of data are already in order. Find the lower quartile and the upper quartile.

h) 0, 2, 2, 3, 5, 6, 6, 8, 9, 9, 10, 12

C The five-point summary ●●●

Remember: The five-point summary is the minimum, lower quartile, median, upper quartile and maximum. Range = maximum − minimum. Interquartile range (IQR) = UQ − LQ.
