Two-Way Tables

Name _____ Date _____ Calculator allowed Version 1 Scan to practise this topic online

KEY WORDS two-way table *(tūtohi ara-rua)* · row · column · total *(tapeke)* · category · fraction *(hautanga)*

A Completing a table ●○○

Remember: Each row adds across to its total, and each column adds down to its total. Start with a row or column that has only one gap.

1. Fill in the missing numbers in each table.

a)

	Yes	No	Total
Girls	9	6	
Boys	7	8	
Total			

b)

	Bus	Car	Walk	Total
Year 9	14		7	30
Year 10	11	12	7	
Total		21		

c)

	Glasses	No glasses	Total
Left-handed		5	8
Right-handed	12		42
Total	15	35	

d)

	Swim	Gym	Both	Total
Children		5	10	
Adults	18		20	60
Total	43	27

B Reading a table ●○○

2. Students in two year groups each chose one winter sport. The table shows their choices.

	Football	Netball	Hockey	Total
Year 9	16	14	10	40
Year 10	12	18	10	40
Total	28	32	20	80

a) How many Year 9 students chose netball? ___

b) How many Year 10 students chose football? ___

c) How many students chose hockey? _____

d) How many Year 9 students were asked? ___

e) How many students were asked altogether? ___

f) How many students chose football or netball? ___

C Fractions and percentages ●●●

⚠ **Watch out:** Read the question carefully to choose the right total: "of the students" uses the grand total, but "of the Year 9 students" uses the Year 9 total.

3. Use the sports table above. Give each answer as a fraction in its simplest form.

a) What fraction of the students are in Year 9?

b) What fraction of the students chose hockey?

c) What fraction of the Year 9 students chose football?

d) What fraction of the Year 10 students chose netball?

e) What fraction of the netball players are in Year 10?

f) What fraction of the hockey players are in Year 9?

4. Use the sports table above. Give each answer as a percentage, to 1 decimal place where needed.

a) What percentage of the students chose football?

b) What percentage of the Year 9 students chose netball?

c) What percentage of the Year 10 students chose hockey?

d) What percentage of the football players are in Year 9?

★ Extension

5. In the sports table above, was netball more popular with Year 9 or with Year 10? Use percentages to explain.

6. A group has 60 students, and 32 of them are girls. 25 of the students learn music, and 11 of these are boys. Draw a two-way table and fill in every number.
