Pythagoras' Theorem

Name _____ **Date** _____ Calculator allowed **Version 1**

KEY WORDS right-angled triangle · hypotenuse · square root · Pythagoras' theorem · distance · coordinates

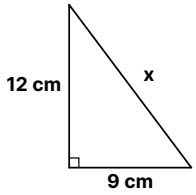

A Finding the hypotenuse ●○○

WORK IN YOUR BOOK

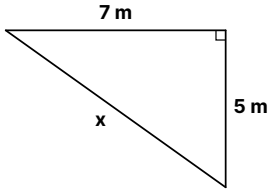

Remember: $a^2 + b^2 = c^2$, where c is the hypotenuse, the longest side. Round to 1 decimal place where needed.

1. Find the hypotenuse, x. Diagrams are not to scale.

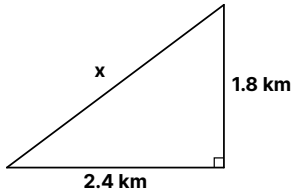

a)

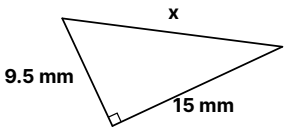

b)

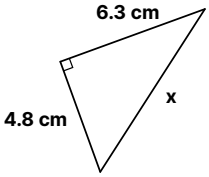

c)

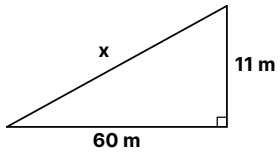

d)

e)

f)

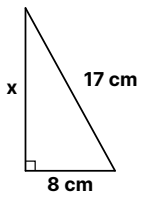

B Finding a shorter side ●●○

WORK IN YOUR BOOK

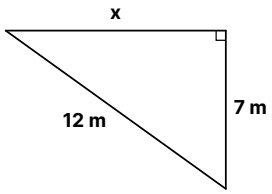

⚠ **Watch out:** When the hypotenuse is given, subtract: $a^2 = c^2 - b^2$.

2. Find the length of the side marked x.

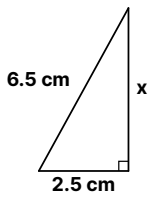

a)

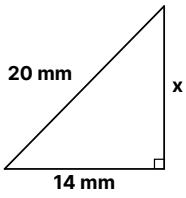

b)

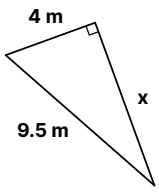

c)

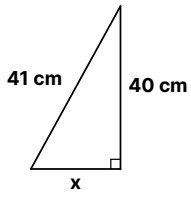

d)

e)

f)

C Mixed practice ●●○ — WORK IN YOUR BOOK

3. Find x. First decide whether x is the hypotenuse or a shorter side.

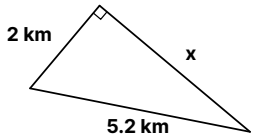

a)

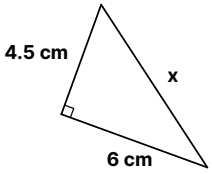

b)

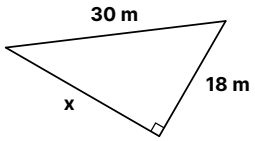

c)

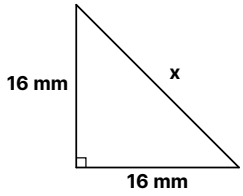

d)

e)

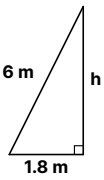

f)

D Problems in context ●●● — WORK IN YOUR BOOK

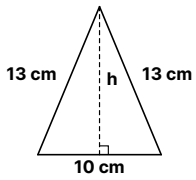

4. A 6 m ladder leans against a wall. Its foot is 1.8 m from the wall. How high up the wall does the ladder reach?

5. A television screen is 88 cm wide and 50 cm high. Find the length of its diagonal, to the nearest centimetre.

6. A boat sails 12 km north and then 9 km east. How far is it from where it started?

7. An isosceles triangle has two sides of 13 cm and a base of 10 cm. Find its height.

8. A wheelchair ramp covers 4 m of ground and rises 0.6 m. Find the length of the sloping surface of the ramp, to 2 decimal places.

E Distance between two points ●●● — WORK IN YOUR BOOK

> **Remember:** Think of a right-angled triangle. Its shorter sides are the difference in the x values and the difference in the y values.

9. Find the distance between each pair of points. Round to 1 decimal place where needed.

a) $(1,\ 2)$ and $(4,\ 6)$ **b)** $(0,\ 0)$ and $(5,\ 12)$ **c)** $(-2,\ 1)$ and $(4,\ 9)$

d) $(2,\ 3)$ and $(5,\ 8)$ **e)** $(-3,\ -1)$ and $(2,\ 4)$ **f)** $(-4,\ 5)$ and $(3,\ -2)$

★ Extension — FOR EARLY FINISHERS

10. A box is 12 cm long, 4 cm wide and 3 cm high. Find the length of the longest straight rod that fits inside it, from one corner to the opposite corner.

11. The diagonal of a square is 10 cm long. Find the length of its sides, to 1 decimal place.
