KEY WORDS area · square units · length · width · base · height · composite shape

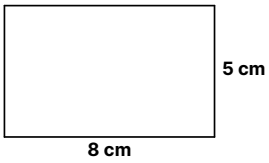

A Rectangles and squares ●○○

WORK IN YOUR BOOK

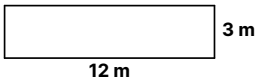

Remember: Area is the amount of space inside a shape, measured in square units such as cm². For a rectangle $A = l \times w$. For a square $A = l^2$.

1. Find the area of each rectangle.

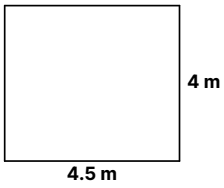

a)

b)

c)

2. Find the area of:

a) A square with sides of 7 cm

b) A rectangle 15 m by 6 m

c) A square with sides of 12 mm

d) A rectangle 20 cm by 2.5 cm

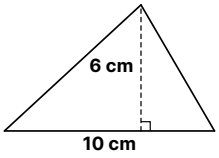

B Triangles ●●○

WORK IN YOUR BOOK

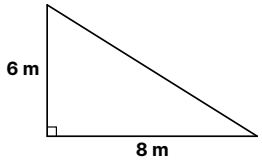

Watch out: Area of a triangle $= \frac{1}{2} \times b \times h$. The height must be at right angles to the base. Do not forget to halve.

3. Find the area of each triangle.

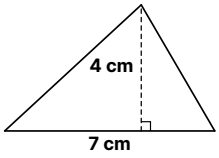

a)

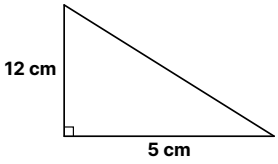

b)

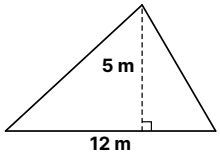

c)

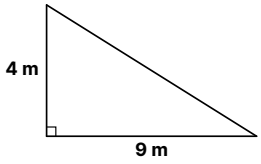

d)

e)

f)

4. Find the area of:

a) A triangle with base 14 cm and height 10 cm

b) A triangle with base 2.5 m and height 4 m

C Missing lengths ●●● WORK IN YOUR BOOK

Remember: Work backwards. If area = length × width, then width = area ÷ length.

5. Answer each question.

a) A rectangle has an area of 54 cm² and a length of 9 cm. Find its width.

b) A square has an area of 49 cm². Find the length of its sides.

c) A triangle has an area of 24 cm² and a base of 8 cm. Find its height.

d) A rectangle has an area of 120 m² and a length of 15 m. Find its width.

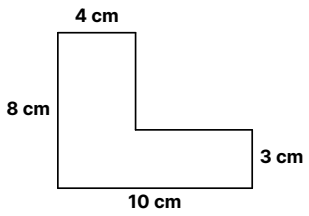

e) A square has an area of 144 m². Find the length of its sides.

D Composite shapes ●●● WORK IN YOUR BOOK

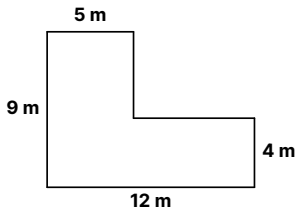

Remember: Split the shape into rectangles, find the area of each one, then add the areas.

6. All the corners are right angles. Find the area of each shape.

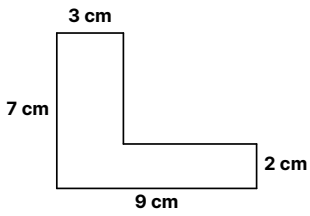

a)

b)

c)

E Area or perimeter? ●●● WORK IN YOUR BOOK

Remember: Perimeter is the distance around the edge (fences, borders, frames). Area is the space covered (carpet, paint, grass).

7. Decide whether each problem needs the area or the perimeter, then work it out.

a) A fence is put all the way around a garden that is 8 m long and 5 m wide. How long is the fence?

b) Carpet is laid in a room that is 4 m long and 3 m wide. How much carpet is needed?

c) A farmer sows grass seed on a paddock that is 60 m long and 40 m wide. What size is the paddock?

d) Tape is stuck around the edge of a rug that is 3 m long and 2.5 m wide. How much tape is needed?

★ Extension FOR EARLY FINISHERS

8. A rectangular lawn is 12 m long and 8 m wide. A square flower bed with sides of 3 m is cut out of it. Find the area of grass that is left.

9. A triangular sail has a base of 6 m and a height of 4 m. Sail cloth costs $12 for each square metre. How much does the cloth for the sail cost?
