Rounding and Estimating

Name _____ **Date** _____ No calculator Version 1

KEY WORDS round · nearest · tenth · hundredth · estimate · reasonable

A Rounding whole numbers ●○○

ANSWER ON THE SHEET

> **Remember:** Look at the digit to the right of the place you are rounding to. If it is 5 or more, round up. If it is 4 or less, round down.

1. Round each number.

a) 47 (nearest 10) _____ **b)** 283 (nearest 10) _____ **c)** 1,365 (nearest 10) _____

d) 840 (nearest 100) _____ **e)** 2,751 (nearest 100) _____ **f)** 6,049 (nearest 100) _____

g) 3,500 (nearest 1,000) _____ **h)** 12,480 (nearest 1,000) _____ **i)** 79,612 (nearest 1,000) _____

j) 45,000 (nearest 10,000) _____ **k)** 128,300 (nearest 10,000) _____ **l)** 996 (nearest 10) _____

B Rounding decimals ●●○

ANSWER ON THE SHEET

> ⚠ **Watch out:** Do not just cut the number off. 3.86 to the nearest tenth is 3.9, not 3.8.

2. Round each number.

a) 7.4 (nearest whole number) _____ **b)** 3.86 (nearest tenth) _____

c) 0.273 (nearest hundredth) _____ **d)** 12.65 (nearest tenth) _____

e) 9.5 (nearest whole number) _____ **f)** 4.108 (nearest hundredth) _____

g) 0.049 (nearest hundredth) _____ **h)** 26.97 (nearest tenth) _____

i) 5.354 (nearest hundredth) _____ **j)** 0.6 (nearest whole number) _____

k) 18.45 (nearest tenth) _____ **l)** 19.96 (nearest tenth) _____

m) 2.499 (nearest whole number) _____ **n)** 6.005 (nearest hundredth) _____

o) 0.95 (nearest tenth) _____

C Estimating ●●○

WORK IN YOUR BOOK

> **Remember:** Round each number so that it has one digit followed by zeros: 38 becomes 40 and 517 becomes 500. Then calculate.

3. Estimate the answer to each calculation. Show the rounded numbers you used.

a) 38 × 21 **b)** 517 + 289 **c)** 62 × 48

d) 792 ÷ 19 **e)** 913 − 388 **f)** 395 × 5

g) 6,120 ÷ 28 **h)** 71 × 9 **i)** 4,870 + 3,210

D Is it reasonable? ●●●

WORK IN YOUR BOOK

> **Remember:** An estimate tells you roughly how big the answer should be. It catches an answer that is ten times too big or too small.

4. One of the three answers is correct. Use an estimate to choose it. Do not work it out exactly.

a) 38×21: 79.8, 798, 7,980

b) $612 \div 18$: 3.4, 34, 340

c) $5{,}890 + 3{,}140$: 903, 9,030, 90,300

d) 29×52: 150.8, 1,508, 15,080

e) $9{,}120 - 2{,}985$: 613.5, 6,135, 61,350

E Problems ●●●

WORK IN YOUR BOOK

5. Estimate the answer to each problem. Show the rounded numbers you used.

a) A school orders 28 boxes of pencils. Each box holds 48 pencils. About how many pencils is that?

b) Sam has $19.80. Pies cost $4.95 each. About how many pies can Sam buy?

c) A car travels 589 km on 31 litres of petrol. About how many kilometres does it travel on each litre?

★ Extension

FOR EARLY FINISHERS

6. A whole number is rounded to the nearest 10 and the answer is 80. What is the smallest the number could be? What is the largest?

7. Round 9.96 to the nearest tenth. Explain why the answer still needs a digit after the decimal point.
