Transformations

Name _____ **Date** _____ No calculator Version 1

KEY WORDS object · image · translation · reflection · mirror line · rotation · enlargement · scale factor

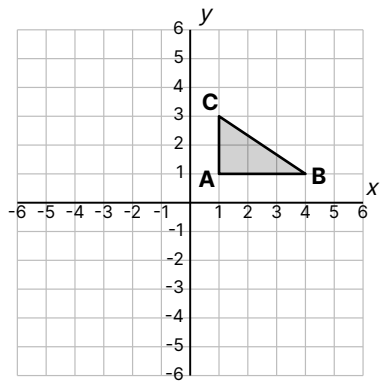

A Translation ●○○

ANSWER ON THE SHEET

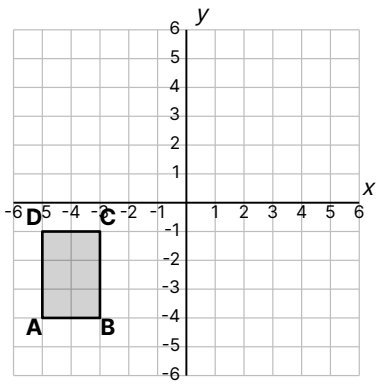

Remember: A translation slides every point the same distance in the same direction. Label the image A′, B′, C′.

1. Draw the image of each shape.

a) Translate the shape 5 units left and 2 units up.

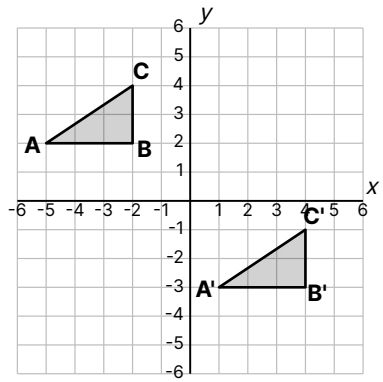

b) Translate the shape 7 units right and 3 units up.

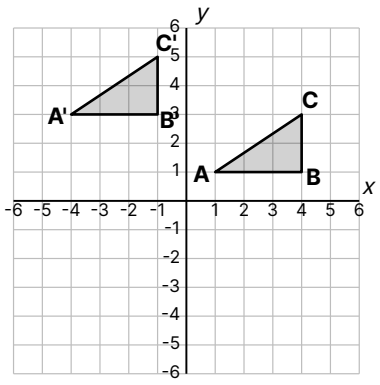

2. Each shape ABC has been translated to A′B′C′. Describe the translation.

a)

_____

b)

_____

B Reflection ●●○

ANSWER ON THE SHEET

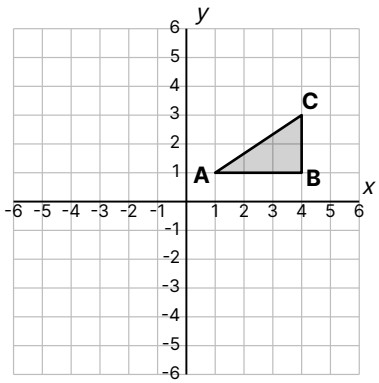

Remember: Each point and its image are the same distance from the mirror line, on opposite sides of it.

3. Draw the image of each shape.

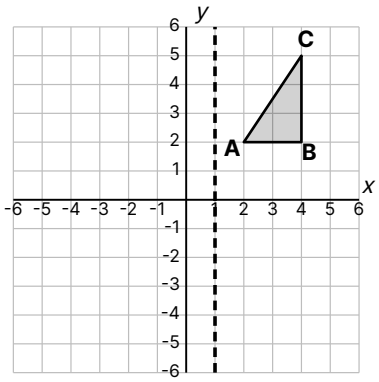

a) Reflect the shape in the y-axis.

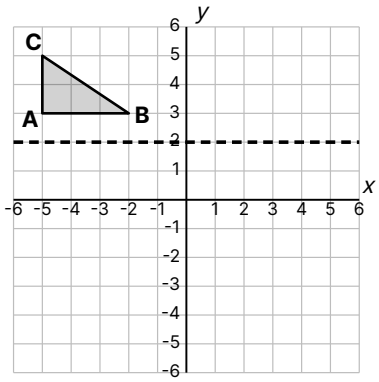

b) Reflect the shape in the x-axis.

c) Reflect the shape in the line $x = 1$ (the dashed line).

d) Reflect the shape in the line $y = 2$ (the dashed line).

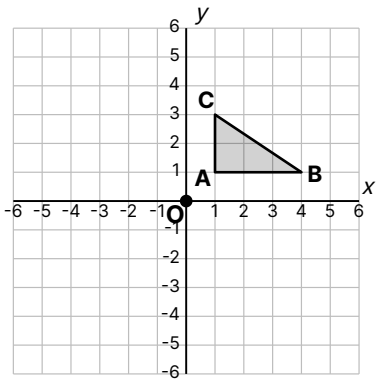

C Rotation ●●●

ANSWER ON THE SHEET

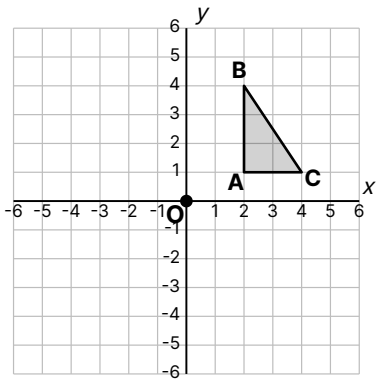

Remember: Every point turns through the same angle about the centre. Tracing paper helps: trace the shape, hold the centre still and turn.

4. Draw the image of each shape.

a) Rotate the shape 180° about the point O.

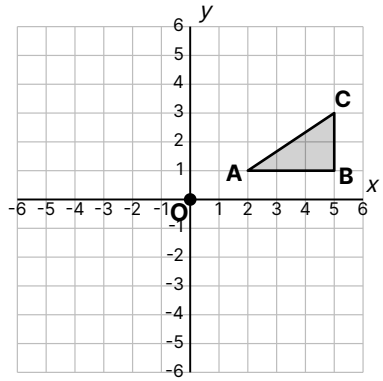

b) Rotate the shape 90° clockwise about the point O.

c) Rotate the shape 90° anticlockwise about the point O.

d) Rotate the shape 90° clockwise about the point O.

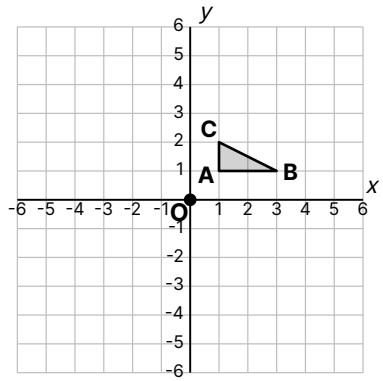

D Enlargement ●●●

ANSWER ON THE SHEET

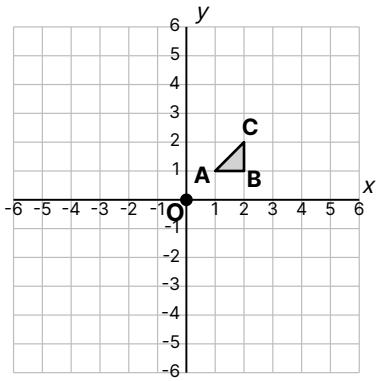

Remember: Multiply the distance from the centre to each point by the scale factor. A scale factor less than 1 makes the shape smaller.

5. Draw the image of each shape.

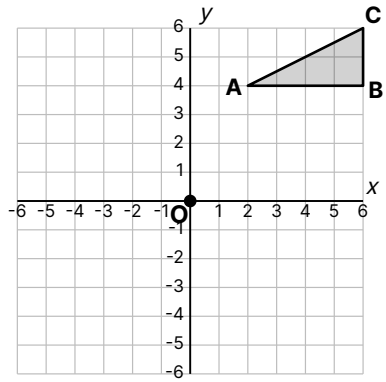

a) Enlarge the shape by a scale factor of 2, with centre O.

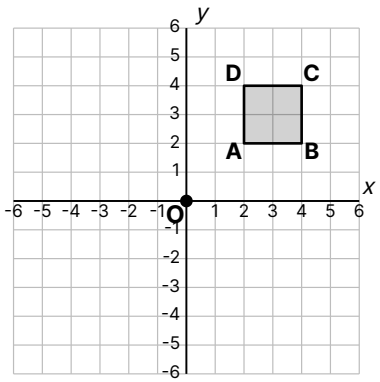

b) Enlarge the shape by a scale factor of 3, with centre O.

c) Enlarge the shape by a scale factor of 0.5, with centre O.

d) Enlarge the shape by a scale factor of 1.5, with centre O.

E Combined transformations ●●● ANSWER ON THE SHEET

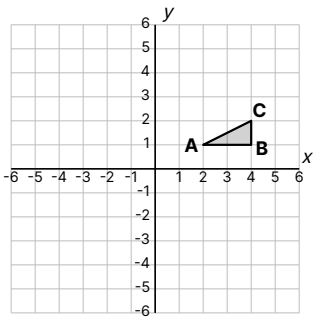

Remember: Do the first transformation, then do the second one to the new shape.

6. Draw the final image of each shape.

a) Translate the shape 2 units right and 3 units up. Then reflect the new shape in the y-axis.

b) Reflect the shape in the x-axis. Then translate the new shape 6 units left and 2 units down.

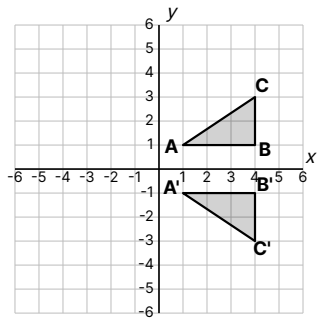

F Naming the transformation ●●● WORK IN YOUR BOOK

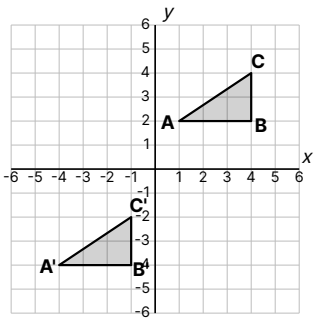

Remember: Translation: a slide. Reflection: a flip. Rotation: a turn. Enlargement: a change of size.

7. Shape ABC has been transformed to A′B′C′. Name and describe each transformation.

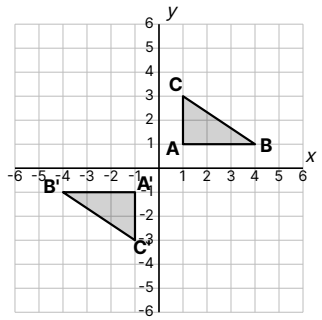

a)

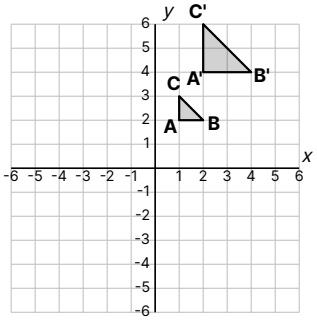

b)

c)

d)

★ Extension FOR EARLY FINISHERS

8. Without drawing, write the coordinates of the image of the point $P(4,\ 2)$ after each transformation.

a) Translation 6 left and 1 up _____

b) Reflection in the x-axis _____

c) Reflection in the y-axis _____

d) Rotation of 180° about (0, 0) _____
