Pythagoras' Theorem

Name _____ **Date** _____ Calculator allowed **Version 1**

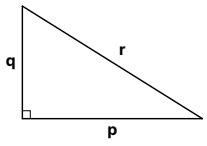

KEY WORDS right-angled triangle · hypotenuse · square · square root · Pythagoras' theorem

A The hypotenuse ●○○

ANSWER ON THE SHEET

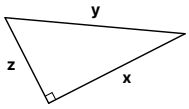

1. Write the letter of the hypotenuse of each triangle.

a)

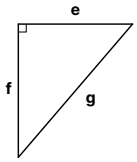

Hypotenuse: _____

b)

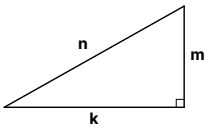

Hypotenuse: _____

c)

Hypotenuse: _____

d)

Hypotenuse: _____

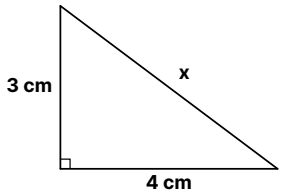

B Finding the hypotenuse ●○○

WORK IN YOUR BOOK

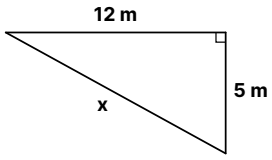

Remember: $a^2 + b^2 = c^2$, where c is the hypotenuse, the longest side.

2. Find the hypotenuse, x. Round to 1 decimal place where needed. Diagrams are not to scale.

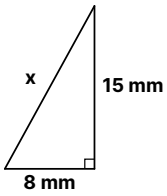

a)

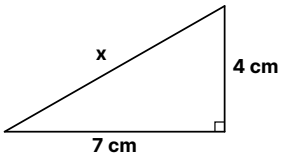

b)

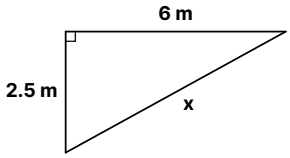

c)

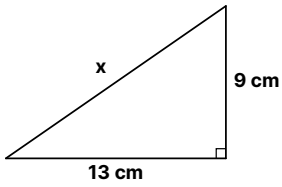

d)

e)

f)

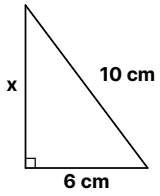

C Finding a shorter side ●●○

WORK IN YOUR BOOK

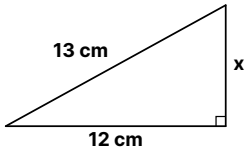

Watch out: Here the hypotenuse is given, so subtract: $a^2 = c^2 - b^2$.

3. Find the length of the side marked x. Round to 1 decimal place where needed.

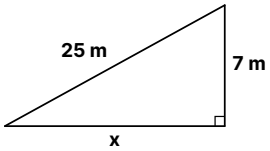

a)

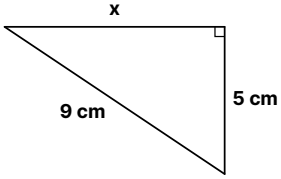

b)

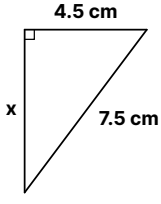

c)

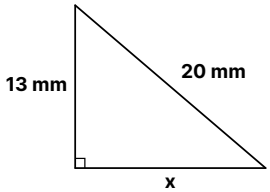

d)

e)

f)

D Mixed practice ●●○ — WORK IN YOUR BOOK

4. Find x. First decide whether x is the hypotenuse or a shorter side.

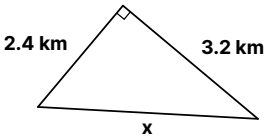

a)

b)

c)

E Is it a right-angled triangle? ●●○ — ANSWER ON THE SHEET

> **Remember:** It is right-angled only if the squares of the two shorter sides add up to the square of the longest side.

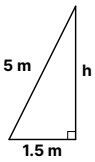

5. These are the side lengths of six triangles. Write yes if the triangle is right-angled and no if it is not.

a) 6 cm, 8 cm, 10 cm _____ **b)** 5 cm, 6 cm, 8 cm _____ **c)** 9 m, 40 m, 41 m _____

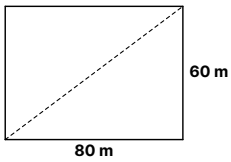

d) 7 m, 10 m, 12 m _____ **e)** 1.5 cm, 2 cm, 2.5 cm _____ **f)** 10 mm, 15 mm, 18 mm _____

F Problems ●●● — WORK IN YOUR BOOK

6. A 5 m ladder leans against a wall. The foot of the ladder is 1.5 m from the wall. How high up the wall does the ladder reach?

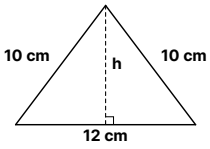

7. A rectangular field is 80 m long and 60 m wide. A path runs straight across it from one corner to the opposite corner. How long is the path?

8. A ship sails 12 km east and then 9 km north. How far is it from where it started?

9. An isosceles triangle has two sides of 10 cm and a base of 12 cm. Find its height, h.

★ Extension — FOR EARLY FINISHERS

10. Find the distance between the points $(1, 2)$ and $(7, 10)$.

11. A box is 12 cm long, 4 cm wide and 3 cm high. Find the length of the longest straight rod that fits inside it.

12. The diagonal of a square is 10 cm long. Find the length of its sides.

13. A right-angled triangle has a hypotenuse of 25 cm and one side of 7 cm. Find its area.
